# TIGER GOLD

Developing Colombia's Next Gold Mine

Q3 2025

# Cautionary Statements

**This Presentation Does Not Constitute An Offer To Sell Or Buy Securities**

This presentation was prepared as a summary overview only of the current affairs of Tiger Gold Corp. (the "**Company**" or "**Tiger Gold**") and was not prepared for the purpose of assisting prospective investors in deciding to invest in any security. The Company does not make any representation about the completeness, truth, or accuracy of the information contained in this presentation. The Company expressly warns readers not to rely on this information for investment purposes. The information contained herein is not and should not be construed as either an offer or solicitation to purchase securities in the Company, nor as legal, financial, or tax advice. No securities regulatory authority or similar authority has reviewed or in any way passed on the accuracy or adequacy of this presentation.

**This Presentation Contains Forward-Looking Information And Statements**

This presentation contains certain forward-looking statements and forward-looking information as defined under applicable Canadian securities laws. Statements contained in this presentation that are not historical facts are forward-looking statements that involve known and unknown risks and uncertainties. Any statements that refer to expectations, projections or other characterizations of future events or circumstances contain forward-looking statements. In certain cases, forward-looking statements and information can be identified using forward-looking terminology such as "may", "will", "would", "could", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans", "potential" or similar terminology. Forward-looking statements and information are made as of the date of this news release, and include, but are not limited to, the ability of the Company to complete its work programs, exploration activities and drilling plans as currently anticipated by management, the type and potential scale of production at the Quinchia Gold Project, the potential of the Company's mineral projects generally, the plans and goals of the Company, including key events and catalysts, the timing, cost, and completion of any future exploration plans at the Company's mineral properties, the Company listing on a stock exchange and the timing and terms thereof, and the anticipated terms and use of proceeds from the Company's future financings, the ability of the Company to complete future financings, the issued and outstanding securities of the Company at listing, projected mining and process recovery rates, capital and operating cost estimates and working capital requirements, and economic estimates and forecasts related to the Quinchia Gold Project. These forward-looking statements represent management's current beliefs, expectations, estimates and projections regarding future events and operating performance, which are based on information currently available to management, management's historical experience, perception of trends and current business conditions, expected future developments and other factors which management considers appropriate. Such forward-looking statements involve numerous risks and uncertainties, and actual results may vary.

Important risks and other factors that may cause actual results to vary include, without limitation, risks related to the ability of the Company to accomplish its plans and objectives with respect to the acquisition and development of its projects, including pursuant to the Option Agreement (as defined herein), within the expected timing or at all, the timing and receipt of certain required approvals, changes in commodity prices, costs of production, unanticipated reclamation costs unexpected , variations in quantity of mineralised material, grade, or recovery rates, risks inherent in exploration estimates and results, risks inherent in exploration and development activities, changes in development or mining plans due to changes in logistical, technical or other factors, unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications, cost escalation, unavailability of materials, equipment or third party contractors, delays in the receipt of government approvals, industrial disturbances, job action, and unanticipated events related to local communities, health, safety and environmental matters), changes in governmental regulation of mining operations, political risk, social unrest, changes in general economic conditions or conditions in the financial markets, risks related to the Company's ability to complete future financings on the terms anticipated, or at all, that the Company may not be able to list on a stock exchange on the timeline anticipated or at all, and other risks related to the ability of the Company to proceed with its plans for its mineral projects. In making the forward-looking statements in this news release, the Company has applied several material assumptions, including without limitation, the assumptions that: market fundamentals will result in sustained mineral demand and prices; any necessary approvals, consents, and permits (including environmental licenses and prior consultation of Indigenous communities requirements) in connection with the development of its projects will be obtained; financing for the development, construction and continued operation of its projects will continue to be available on terms suitable to the Company; sustained commodity prices will continue to make its projects economically viable; there will not be any unfavourable changes to the economic, political, permitting and legal climate in which the Company operates; the Company will complete future financing on the terms and timeline currently anticipated by management; the Company will be able to carry out its exploration, drilling and work plans as anticipated by management and in the PEA (defined herein), and the Company will advance its current plans and goals, including listing on a stock exchange, on the timelines and in manner currently contemplated by management. Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events, or results to differ materially from those described in forward-looking statements, there may be other factors that cause the actual results or performance by the Company to differ materially from those expressed in or implied by any forward-looking statements. Accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what impact they will have on the results of operations or the financial condition of the Company. Investors should therefore not place undue reliance on forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.

**This Presentation Includes Market And Industry Data Obtained From Public Sources**

This presentation includes market and industry data which was obtained from various publicly available sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third-party sources referred to in this presentation, or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company makes no representation as to the accuracy of such information.

**Cautionary Note Regarding Technical Information and Historical Mineral Resource and Reserve Disclosure**

Certain details in this presentation with respect to the Quinchía Gold Project are derived from the technical report and preliminary economic assessment, titled "Quinchía Gold Project, NI 43-101 Technical Report & Preliminary Economic Assessment, Department of Risaralda, Colombia", dated September 19, 2025 and with an effective date of September 18, 2025 (the "**PEA**"). The PEA was prepared by Ausenco Engineering Canada ULC, Moose Mountain Technical Services, and Aurum Consulting.. Any reference to capitalized terms, figures, tables or citations not included herein correspond to such items in the PEA.

For readers to fully understand the technical information in this presentation, they should read the PEA (available on SEDAR+ at www.sedarplus.ca under the Company's profile) in its entirety, including all qualifications, assumptions and exclusions that relate to the technical and economic information herein. Such qualifications, assumptions and exclusions are not fully described herein and this presentation does not purport to be a complete summary of the PEA.

The Company cautions that the historical mineral resource and mineral reserve estimates discussed herein with respect to the Dos Quebradras deposit are considered historical in nature. A Qualified Person ("**QP**") as defined in *National Instrument 43-101 – Standards of Disclosure for Mineral Projects* ("**NI 43-101**") has not done sufficient work to classify these historical estimates as current mineral resources or mineral reserves. Consequently, the Company is not treating these historical estimates as current mineral resources or mineral reserves, and they should not be relied upon as such. While the historical estimates described herein were reported to have been prepared in accordance with the *Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves* ("**JORC**") and/or *CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines* ("**CIM**") in effect at the time of their preparation, there is no guarantee that they would be consistent with current standards and definitions.

The most recent historical Mineral Resource estimate for the Dos Quebradas deposit was prepared by Resource Development Associates Inc. (RDA) with an effective date of February 25, 2020, and reported by LCL in accordance with the JORC Code (2012). The Company has not undertaken sufficient independent verification of the data, assumptions, methodologies, or parameters upon which the historical estimates were based. There is a risk that any future verification work, exploration, analysis, and modelling may produce results that differ substantially from the historical estimates presented herein. The Company considers these historical estimates to be relevant as they indicate the potential presence and scale of mineralization on the properties. The Company intends to undertake data verification programs, potentially including assaying of historical core, database validation and verification, check surveys, and updated geological modelling to support the preparation of current mineral resource estimates prepared by a QP in accordance with current NI 43-101 and CIM standards. Tiger Gold considers Dos Quebradas an exploration prospect within the Quinchía Gold Project, with potential requiring further drilling and evaluation.

**Qualified Person:** Robert Vallis, P.Eng, MBA, a QP as defined by NI 43-101, has reviewed and approved the scientific and technical information in this presentation. Mr. Vallis is the President, Chief Executive Officer and a director of the Company and is not independent to the Company.

# Investment Highlights

- Multi-million-ounce gold project in Colombia's prolific Mid-Cauca belt
- Strong PEA economics and large resource base
- Compelling valuation
- Increasing resources and de-risking toward PFS
- Proven leadership team with a track record of execution and surfacing shareholder value

## Proven Cross-Functional Leadership Team

**Robert Vallis** MBA, P.Eng.
President & CEO, Director

**Rickardo Welyhorsky** P.Eng.
COO

**Rick Huang** BA, MBA, CPA
CFO

**Jeremy Link** M.Eng., P.Eng.
VP Corporate Development

**Terese Giselman**
Corporate Secretary

## Board of Directors

**Keith Dolo**
Executive Chairman

**Fraser Macdougall**
Director

**Gary MacDonald** MBA
Director

**James Currie** P.Eng.
Director*

**Robert Vallis** MBA, P.Eng.
President & CEO, Director

* To be appointed at the proposed go-public transaction

## Established In-Country Colombian Team

**César García** M.Sc., FAusIMM
Exploration Manager

**Luis Felipe Castañeda**
General Manager

## Advisory Board

**Dr. Ruben Padilla**

**Ron Halas** GDBA, P.Eng.

**Siri C. Genik** LL.B.

# Quinchía Gold Project

**Prolific Mining Belt**

Tiger Gold holds an exclusive option[1] to acquire the Quinchía Gold Project, located in Colombia's Mid-Cauca porphyry belt. This region hosts many multi-million-ounce gold and copper-gold deposits and operating mines[2,3], including:

- Marmato Mine (Aris Mining) – **24M oz Au**
- La Colosa (AngloGold Ashanti) – **28M oz Au**
- Nuevo Chaquiro (AngloGold Ashanti) – **7M oz Au**
- Gramalote (B2Gold) – **5.2M oz Au**
- Buriticá Mine (Zijin Mining) – **5.2M oz Au + 21M oz Ag**

**Large Resource Base and Strong Foundation of Value**

The Quinchía Project hosts 510,000 oz Au (Measured & Indicated) at Miraflores[4] and 1,580,000 oz Au (Inferred) at Miraflores and Tesorito[4], plus a 495,000 oz Au historical estimate at Dos Quebradas[5].

- PEA provides strong economic and technical foundation.
- Plan to de-risk the project toward PFS.
- Phase 1 drilling to commence in October 2025 to unlock additional upside.

1. See Option Agreement Summary slide in Appendix. 2. Company, industry reports, and Capital IQ.. 3. Mineralisation hosted on nearby projects is not necessarily indicative of mineralisation hosted on the Company's property, and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. 4. See slide 8 for Mineral Resource details. 5. The Dos Quebradas historical estimate has not been verified by a QP and is not being treated as current Mineral Resources or Mineral Reserves; see Cautionary Statements.

Map: Exploration Sites (2025).

# Established Regional Infrastructure

Map: Exploration Sites (2025).

# Quinchía Gold Project

### Phase 1 Drilling Commences in October 2025

10,000 m drill program targeting extension, discovery, and resource definition. Phase 2 planned to commence in 2026.

### Extension Drilling

All deposits outcrop and remain open for expansion, indicating significant potential for resource additions. Drilling at Miraflores will test Mineral Resource expansion at depth, while at Tesorito it will test expansion at depth and along strike.

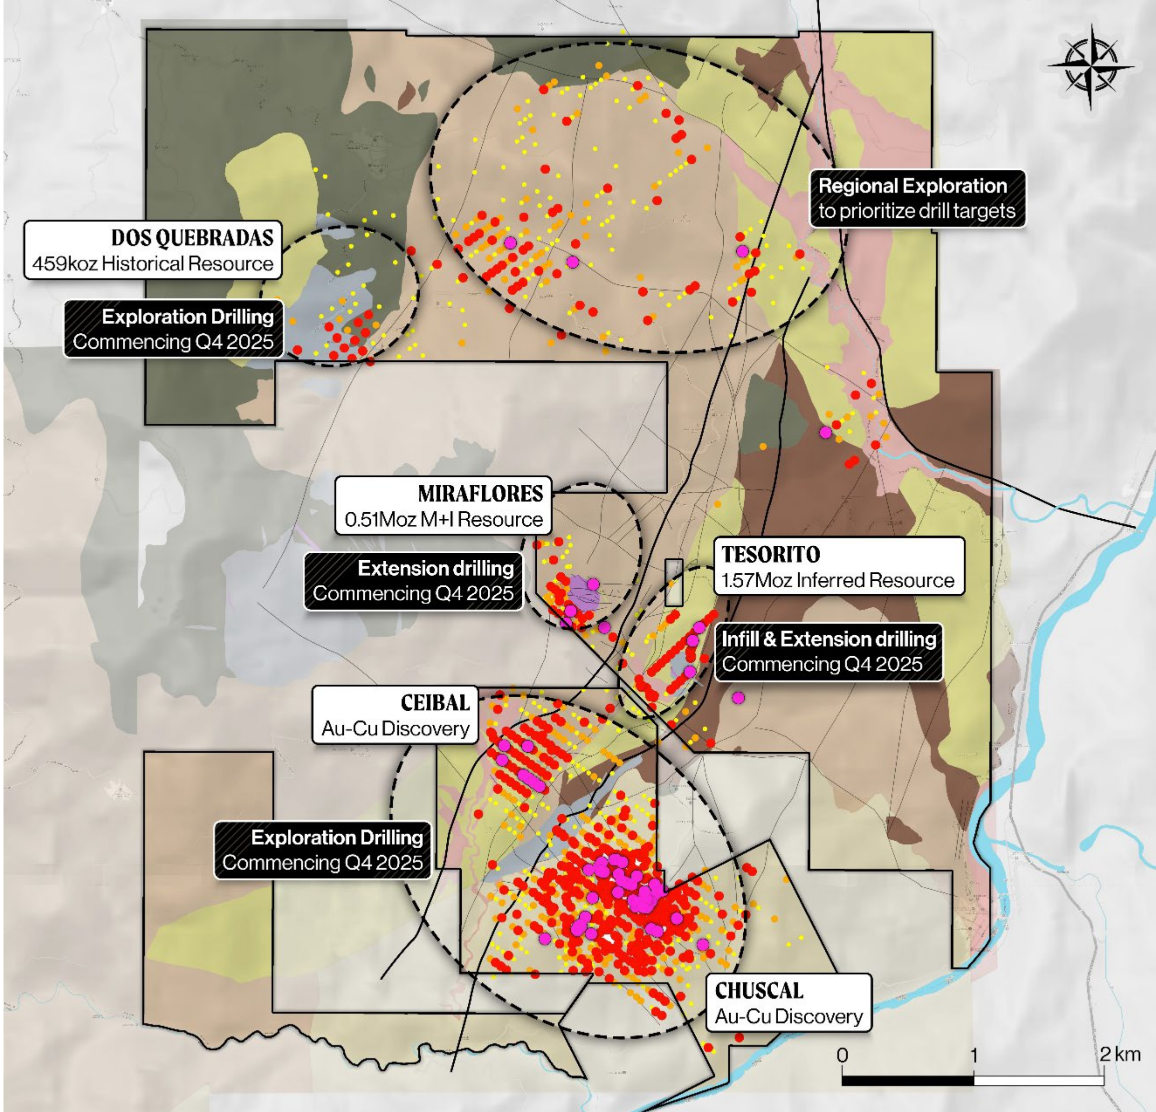
### Exploration Drilling

Parallel to infill and extension drilling, planned exploration drilling in 2025/26 will seek to address key geologic questions, including:

- Potential links between Tesorito and Ceibal at depth.
- Verification of Dos Quebradas geological model and scale.
- Characterize Ceibal and Chuscal's mineralized envelopes.

### Tesorito Resource Definition Drilling

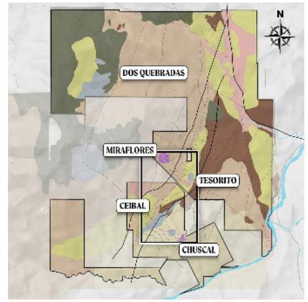
Planned infill drilling will focus on upgrading Inferred Mineral Resource to the Indicated category in preparation for future PFS level studies.



Map by Exploration Sites (2025).

# Quinchía Project

## Setting New Goals and Objectives

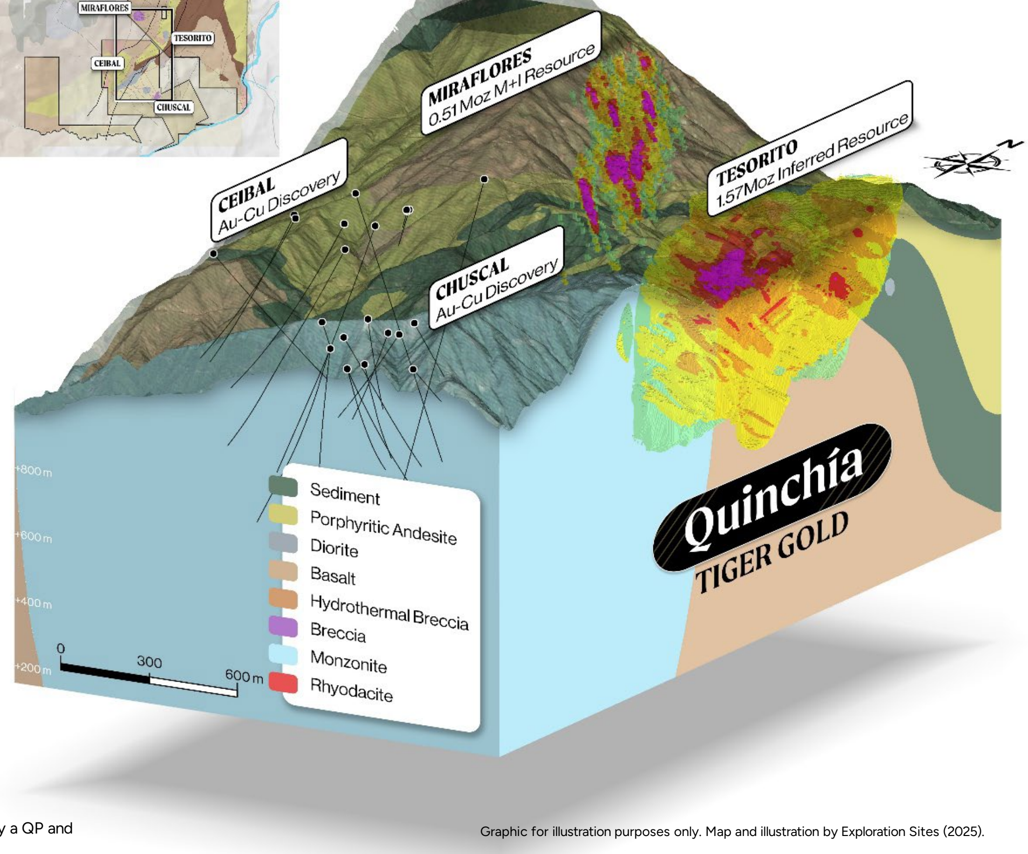


**Multiple Deposits with Significant Upside Potential:**

- **510k oz** Au Measured & Indicated Resource (Miraflores[1])
- **1,570k oz** Au Inferred Resource (Tesorito[1])
- **495k oz** Au Historical Resource (Dos Quebradas[1,2])

**2025/26 Work Program Primary Objectives:**

1. Expand Mineral Resources, verify Dos Quebradas historical estimate, and test nearby targets for additional potential.
2. Increase Tesorito Mineral Resource confidence through infill drilling.
3. Refine geological understanding and models with new drill data.
4. Evaluate how potential resource expansion may affect PEA assumptions for staged development and initial capital planning.
5. Generate the technical data to support future PFS-level studies.



1. See slide 8 for Mineral Resource details. 2. The Dos Quebradas historical estimate has not been verified by a QP and is not being treated as current Mineral Resources or Mineral Reserves; see Cautionary Statements.

Graphic for illustration purposes only. Map and illustration by Exploration Sites (2025).

# Large Resource Base and Production Potential

## Mineral Resource for the Miraflores Gold Deposit, July 31, 2025[1,3,4,5,6,7]

| Category | Tonnes (Mt) | Gold grade (g/t Au) | Contained Gold (Moz) | Silver Grade (g/t Au) | Contained Silver (Moz) |
|---|---|---|---|---|---|
| Measured Resource | 2.8 | 2.75 | 0.24 | 2.37 | 0.21 |
| Indicated Resource | 3.3 | 2.52 | 0.27 | 2.20 | 0.23 |
| Measured + Indicated | 6.1 | 2.62 | 0.51 | 2.28 | 0.44 |
| Inferred Resource | 0.08 | 2.81 | 0.01 | 2.54 | 0.01 |

## Mineral Resource for the Tesorito Gold Deposit, July 31, 2025[2,3,4,5,6,7]

| Category | Tonnes (Mt) | Gold grade (g/t Au) | Contained Gold (Moz) | Silver Grade (g/t Au) | Contained Silver (Moz) |
|---|---|---|---|---|---|
| Inferred Resource | 104 | 0.47 | 1.57 | 0.58 | 1.96 |

## Historical Mineral Resource for the Dos Quebradas Gold Deposit, February 25, 2020[3,4,5,7,8]

| Category | Tonnes (Mt) | Gold grade (g/t Au) | Contained Gold (Moz) | Silver Grade (g/t Au) | Contained Silver (Moz) |
|---|---|---|---|---|---|
| Inferred Resource | 20.2 | 0.71 | 0.459 | - | - |

1. No cut-off grade has been applied as all material inside stope shapes has been reported. 2. Cut-off grade of 0.2 g/t Au. 3. Contained metal and tonnes figures in totals may differ due to rounding. 4. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. 5. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, marketing, or other relevant issues. 6. The Mineral Resources were estimated using CIM (2014) *Standards on Mineral Resources and Reserves, Definitions and Guidelines*. 7. The quantity and grade of reported the Inferred Mineral Resource in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred Mineral Resource as an Indicated or Measured Mineral Resource. It is uncertain if further exploration will result in upgrading any of the Inferred Mineral Resources to an Indicated or Measured Mineral Resource category. 8. The Dos Quebradas historical estimate was reported at a 0.5 g/t Au cut-off, reported to be prepared in accordance with the JORC Code (2012), and has not been verified by a QP and is not being treated as current Mineral Resources or Mineral Reserves by the Company; see Cautionary Statements.

# Quinchía Project

## PEA Highlights

PEA provides a strong economic foundation for the next stage of project growth and evaluation

### PEA Economics

| Base Case (US$2,650/oz) | Spot Case (US$3,700/oz) |
|---|---|
| **US$534mm** NPV (5%) | **US$1,188mm** NPV (5%) |
| **21.3% IRR** | **36.5% IRR** |
| **3.8 Years Payback** | **2.6 Years Payback** |

### Base Case Costs

**US$480mm**
Initial Capital

**US$219mm**
Sustaining Capital

**US$1,340/oz**
LOM AISC

### Production

**140k oz/yr**
1st Five Years Au

**138k oz/yr**
LOM Au

**1.4 Moz Au**
LOM

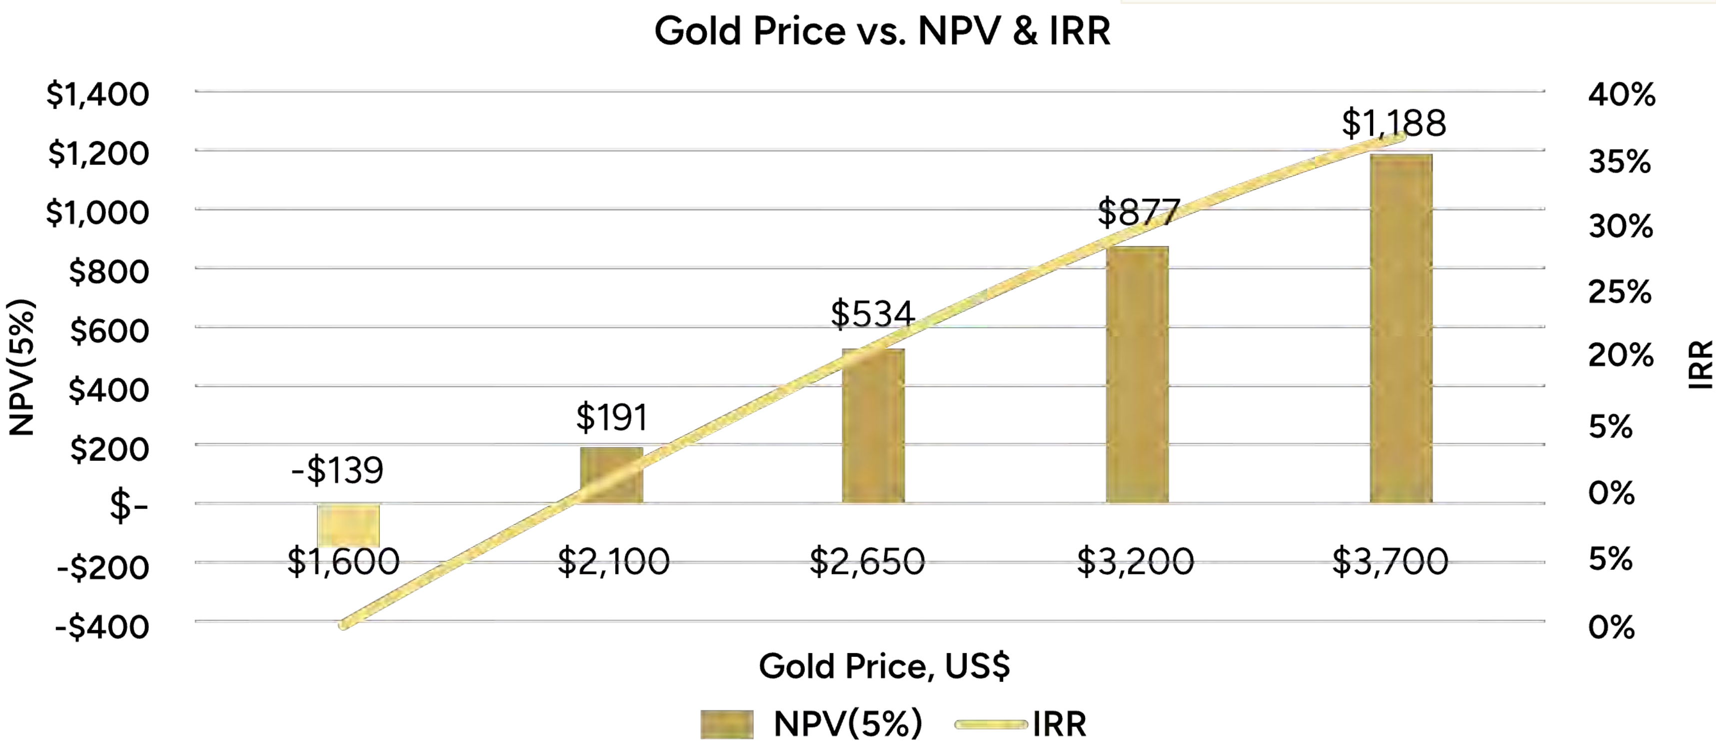
Readers are cautioned that this assessment is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that this preliminary economic assessment will be realized. Life of mine (LOM) cash costs consists of mining costs, processing costs, mine site G&A, refining charges, and royalties. AISC includes cash costs plus sustaining capital, closure cost, and salvage value. Silver price fixed at 29.51/oz Ag.

# Strong PEA Economics

Demonstrates highly attractive results

At current price levels:

NPV 5% and IRR increase to over US$1.2 B and 37%

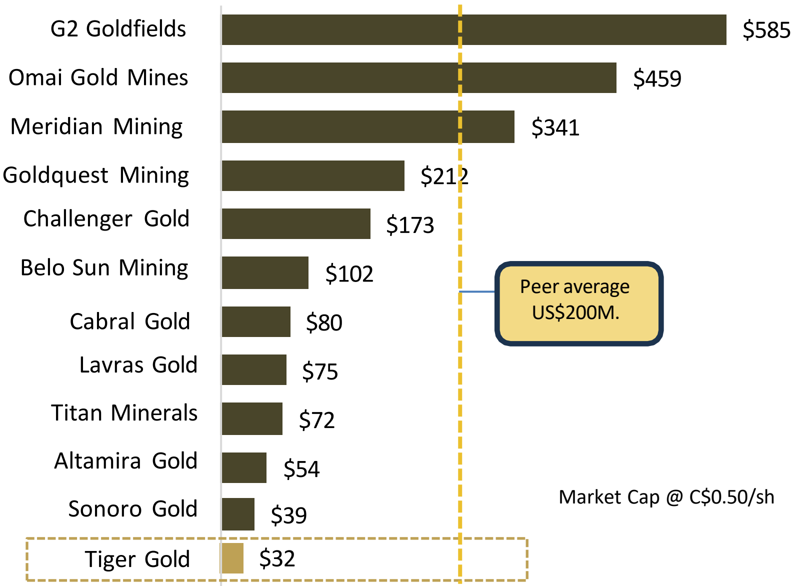


Readers are cautioned that the PEA is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that this PEA will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Silver price fixed at US$29.51/oz Ag.

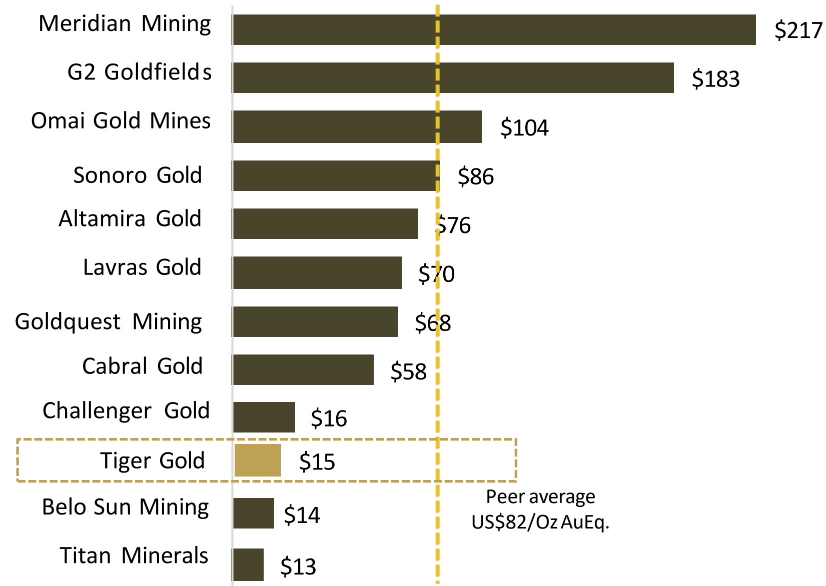
# Well Positioned Against Public Peers

**Public Company Comparables[1,2,3,4,5]**

**Market Cap (US$mm)**



**EV/M&I+I (US$/Oz AuEq.)**

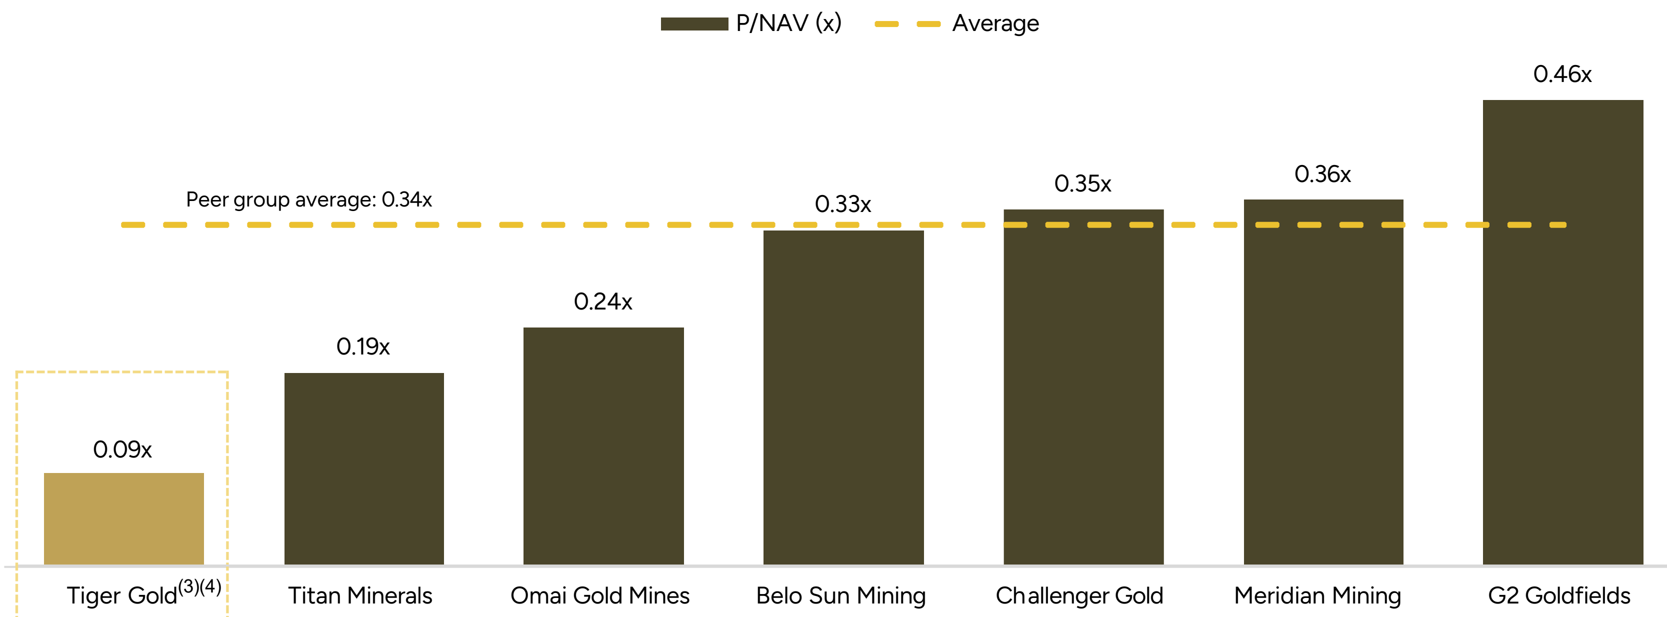


Implied Tiger Gold **Enterprise Value of US$212mm** at Peer Average EV/M&I+I of US$82/oz AuEq.

1. Market data from FactSet as of September 18th, 2025 2. Market cap implied from raise details on issued and outstanding shares at listing, see slide 23-24 3. Resource data from S&P CapitalIQ Pro 4. Tiger Gold M&I+I includes historical resources from Dos Quebradas 5. Source SCP Resource Finance

# P/NAV Comparison

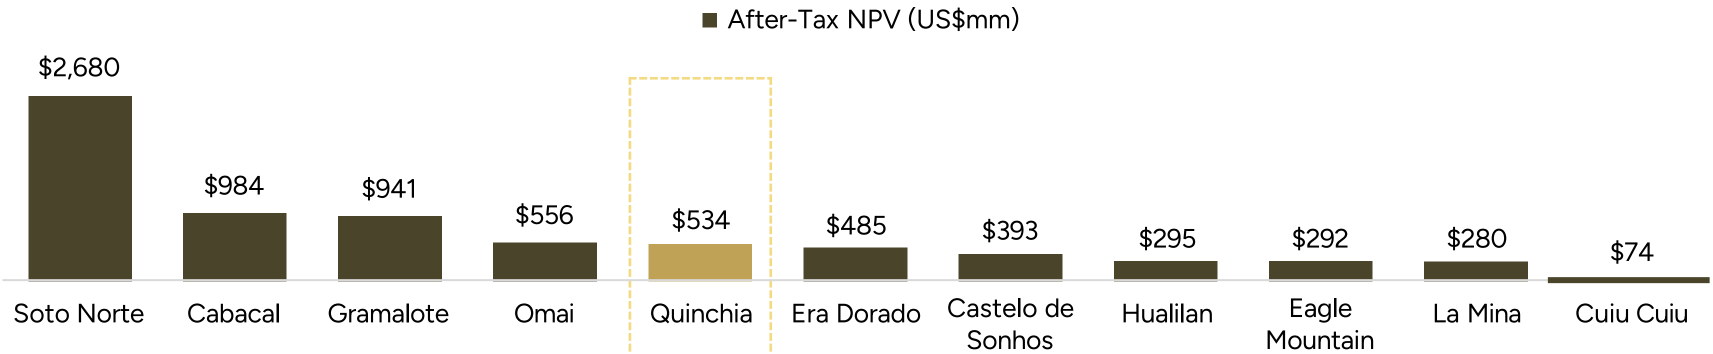
**Public Company Comparables[1,2,3,4,5]**



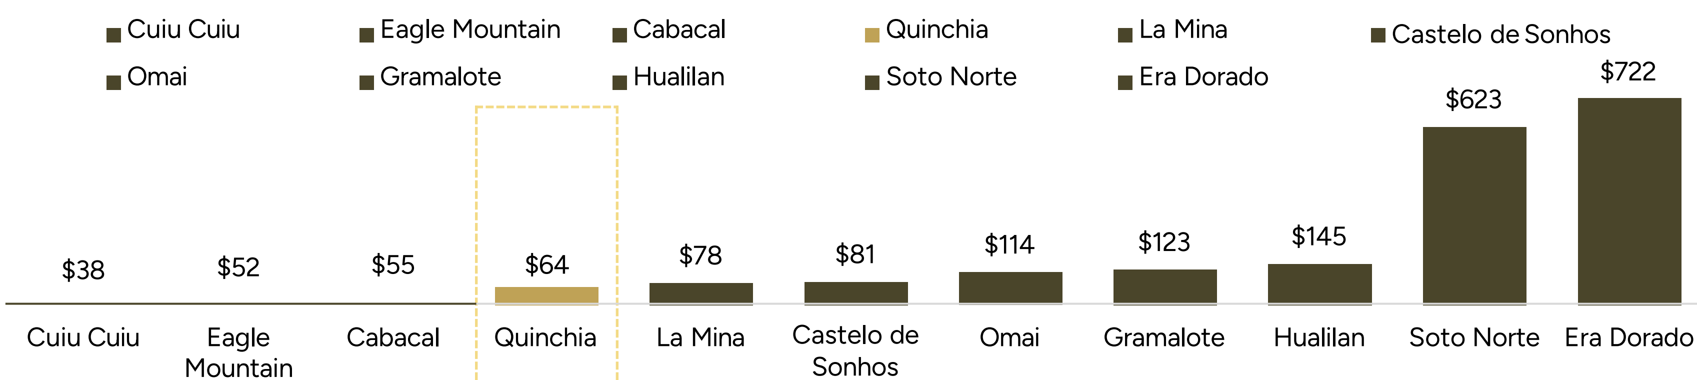
1. Source: SCP Resource Finance. 2. Market data from FactSet as of September 18th, 2025. 3. P/NAV from broker consensus estimates. 4. Tiger Gold implied market capitalization of US$30mm based on proposed RTO financing on a fully diluted pre-money basis; see Appendix. 5. Tiger Gold NAV estimate based on Quinchía PEA Base Case after-tax NPV 5% of US$534mm. 6. The PEA is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that this PEA will be realized.

# Quinchía Stands Out Amongst LATAM Projects

**Quinchia vs LATAM Project Comparables NPV[1]**



**Quinchia vs LATAM Project Comparables Capital Intensity[1, 2]**



1. Source: SCP Resource Finance. 2. Capital Intensity calculated as initial capital expenditure divided by average daily throughput.

# Quinchía Project

## 2025/26 Phase 1 and 2 Programs

### Drill Programs

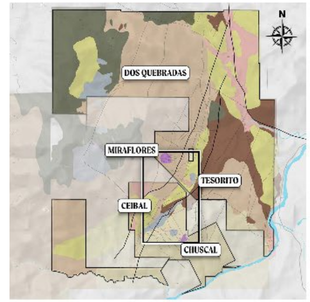
- **Infill:** 4,000 m planned to increase resource confidence.
- **Extension:** Up to 14,000 m planned to test potential extensions of Mineral Resources at depth and along strike.
- **Exploration:** Up to 14,000 m planned to advance earlier-stage targets.

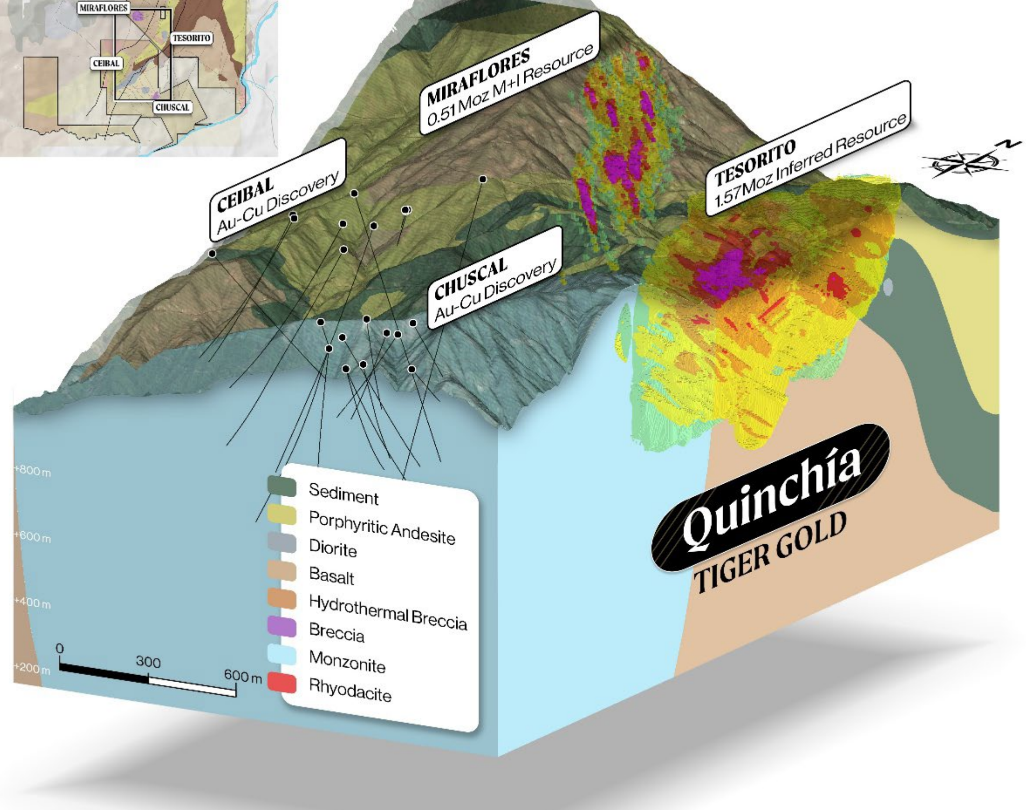
### Regional Exploration to Prioritize Targets for Future Drilling

- Planned field programs include mapping, rock chip sampling, trenching, and resurveying historical collars.
- Exploration modelling to prepare prospects for future drilling.

### Engineering and ESG

- Additional baseline studies.
- Social and community engagement.
- Additional metallurgical test work.
- Mine engineering studies.
- Tailings facility design.





Graphic for illustration purposes only. Graphic and map prepared by Exploration Sites (2025).

# Miraflores Underground Mineral Resource
## Potential for Second Boiling Horizon

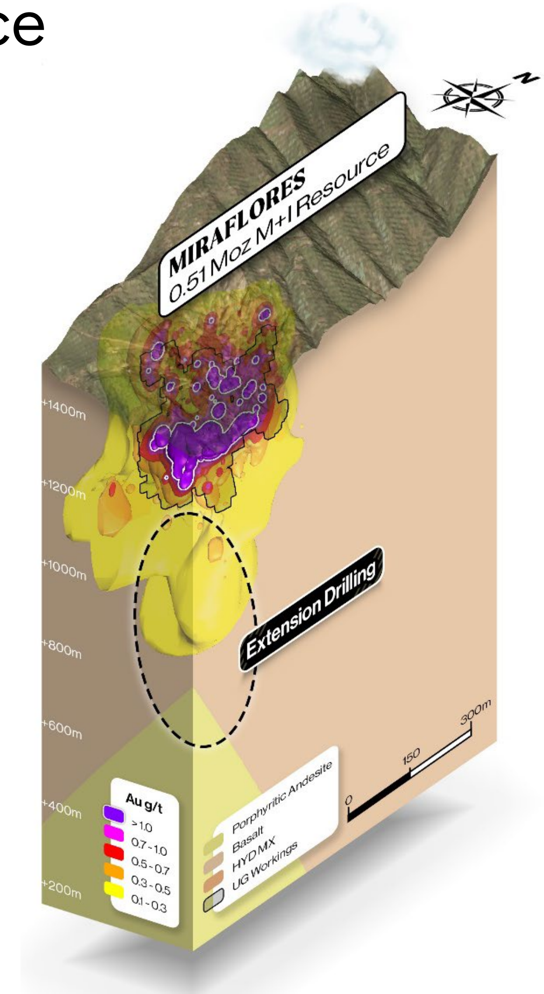
510k ounces Au Measured and Indicated Mineral Resource[1]

**Planned 2025/26 Drilling**

- **Extension Drilling:** Up to 6,000 m planned to test potential extension of the Mineral Resource at depth, including evaluation of a second boiling horizon as predicted by the geologic model.

**Miraflores Highlights**

- Located 1 km from proposed PEA plant.
- 250 m x 200 m breccia pipe footprint at surface, mineralisation traced to >350 m depth.
- Strongest mineralisation between 200-300 m, interpreted as a hydrothermal boiling zone.
- Limited drilling to ~500 m intersected breccia with visible gold, quart-calcite, and base metal sulphides.
- Indicators suggest a potential second boiling zone at greater depth, not yet tested.



Graphic prepared by Exploration Sites (2025).

1. See slide 8 for additional details on Mineral Resource estimate.

# Tesorito Open Pit Mineral Resource
## Targeting Extensions at Depth and Along Strike

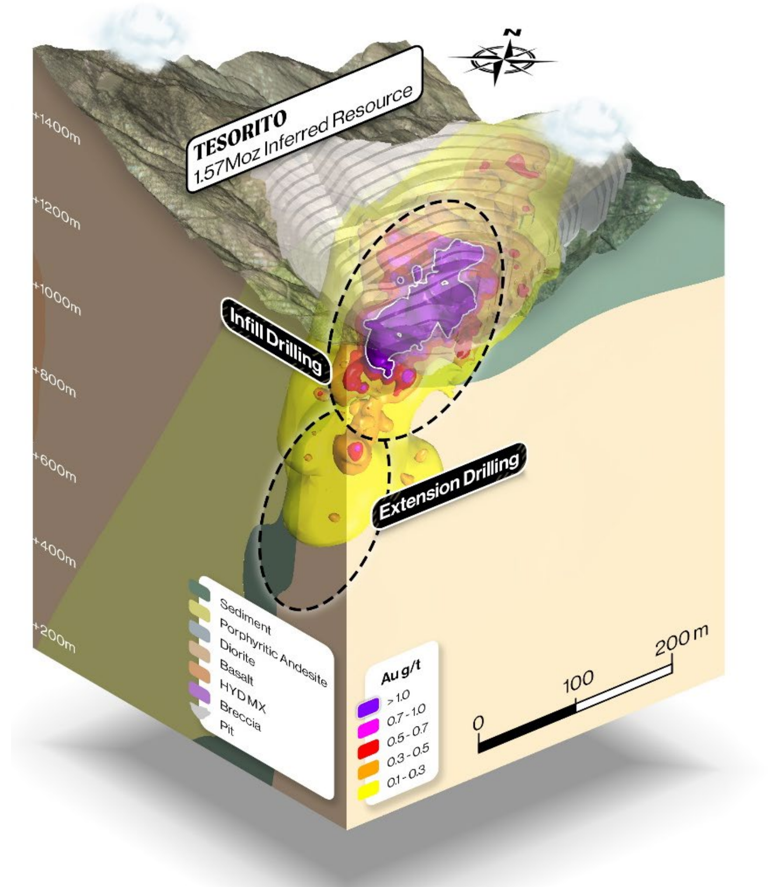
1,570k ounces Au Inferred Mineral Resource[1]

### 2025/26 Drilling

- **Infill Drilling:** 4,000 m planned to increase confidence in Tesorito Mineral Resource.
- **Extension Drilling:** Up to 8,000 m planned to test potential Mineral Resource extensions at depth and along strike.

### Tesorito Highlights

- Located 1 km from proposed PEA plant.
- ~350 m width and >700 m strike, mineralisation traced to >450 m depth.
- It remains open at depth and along strike with additional lateral potential.



1. See slide 8 for additional details on Mineral Resource estimate.

Graphic and map prepared by Exploration Sites (2025).

# Dos Quebradas

## Future Resource Potential

The historical estimate[1] is based on **19 drill holes** totaling **8,824 m**

### Near-Hub Potential

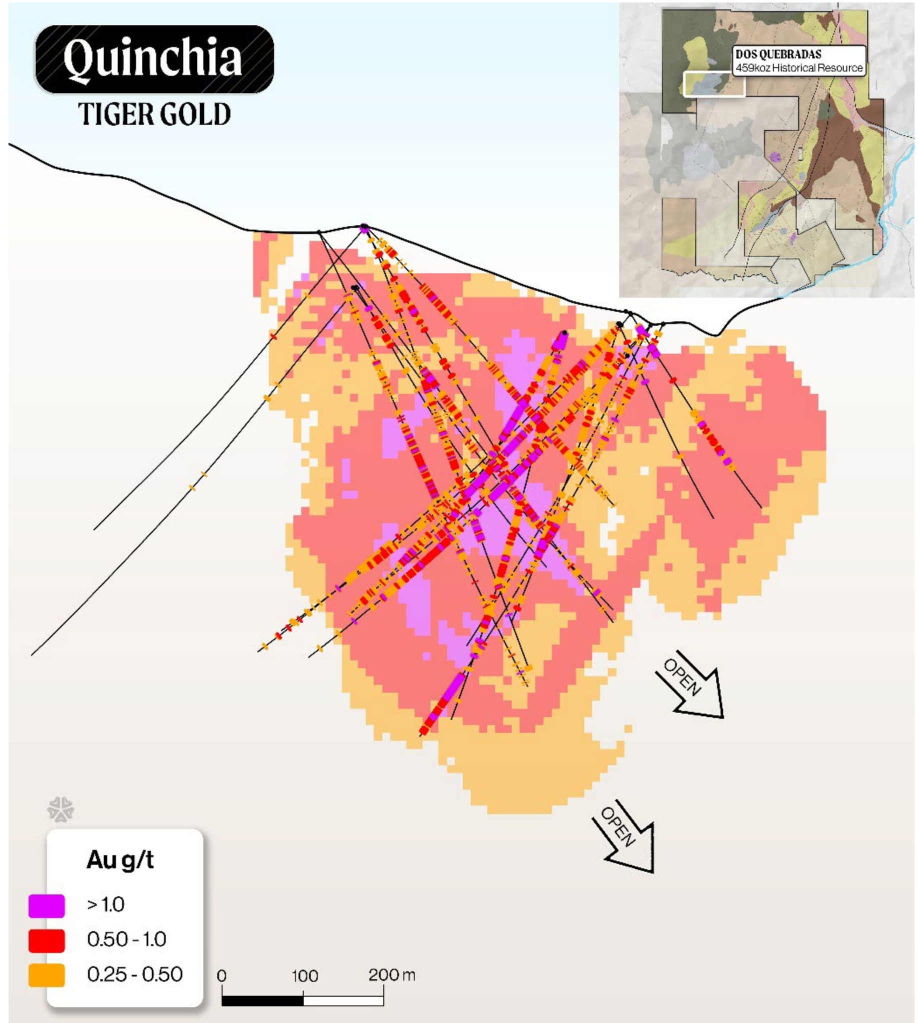
- Dos Quebradas deposit located 3km from proposed PEA plant location.

### 2025 Planned Work Program

- Relog historical core.
- Conduct field mapping and trenching.
- Refine geological interpretation and model.
- Resample historical core to verify assay dataset to determine suitability for mineral resource estimation activities.

### 2026 Planned Drill Program

- 1,000 m of drilling planned to further evaluate the deposit's potential.



Map and section prepared by Exploration Sites (2025).

1. The Dos Quebradas historical estimate has not been verified by a QP and is not being treated as current Mineral Resources or Mineral Reserves; see Cautionary Statements.

# Ceibal and Chuscal

## Future Resource Potential

Alteration, veining, and pathfinder vector to untested porphyry potential

### 2025/26 Drilling

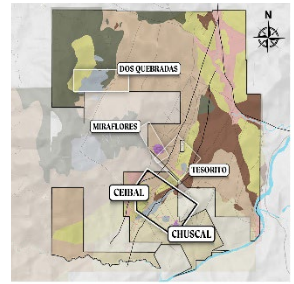
- Up to 6,500 m of drilling planned for each target to evaluate resource potential.

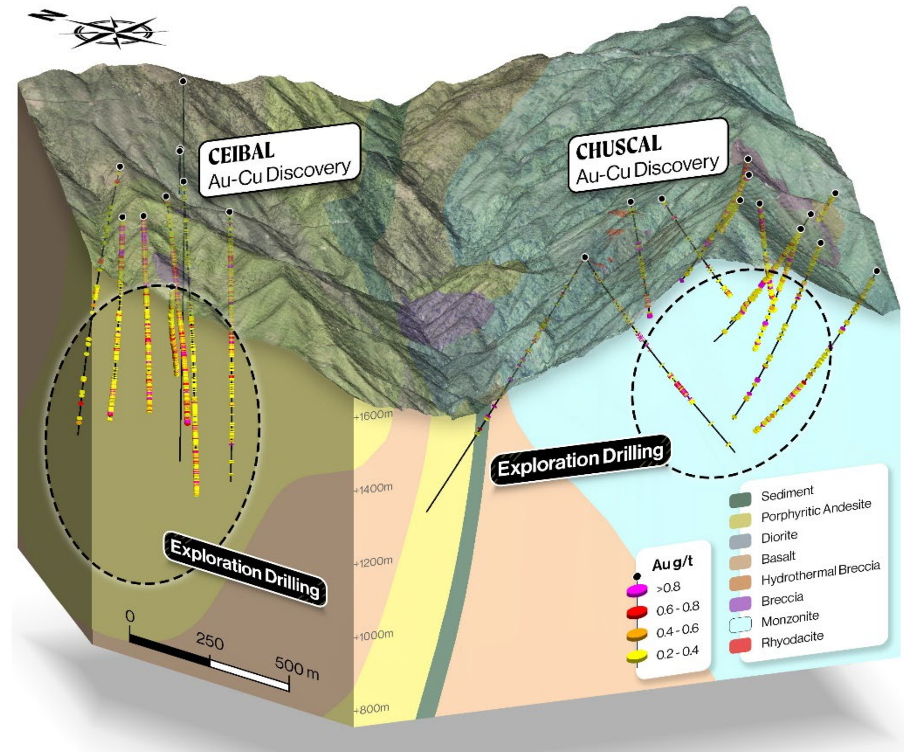
### Ceibal Highlights

- Located ~1 km from the proposed PEA processing plant.
- Similar structural setting to Tesorito within Marmato Fault corridor.
- Drill hole CEDDH02[1,2] returned **586 m at 0.51 g/t Au from surface**, including 14.1 m at 1.02 g/t Au from 572.5 m to end of hole.

### Chuscal Highlights

- Located ~2 km from the proposed PEA processing plant.
- Evidence for two gold-porphyry systems within project footprint
- CCDDH10[1,2] returned 94 m at 0.63 g/t Au from 82 m





1. See LCL Resources Ltd. press releases dated October 16, 2023, and May 3, 2023, for details on Ceibal drilling results. Reported intervals downhole lengths and may not represent true width.
2. Historical results have not been verified by a QP and there is a risk that any future verification work and exploration may produce results that substantially differ from the historical results. The Company considers these results relevant to assess the mineralisation and economic potential of the property.

Graphic and map prepared by Exploration Sites (2025).

# Positioned for Growth

## Milestones Achieved

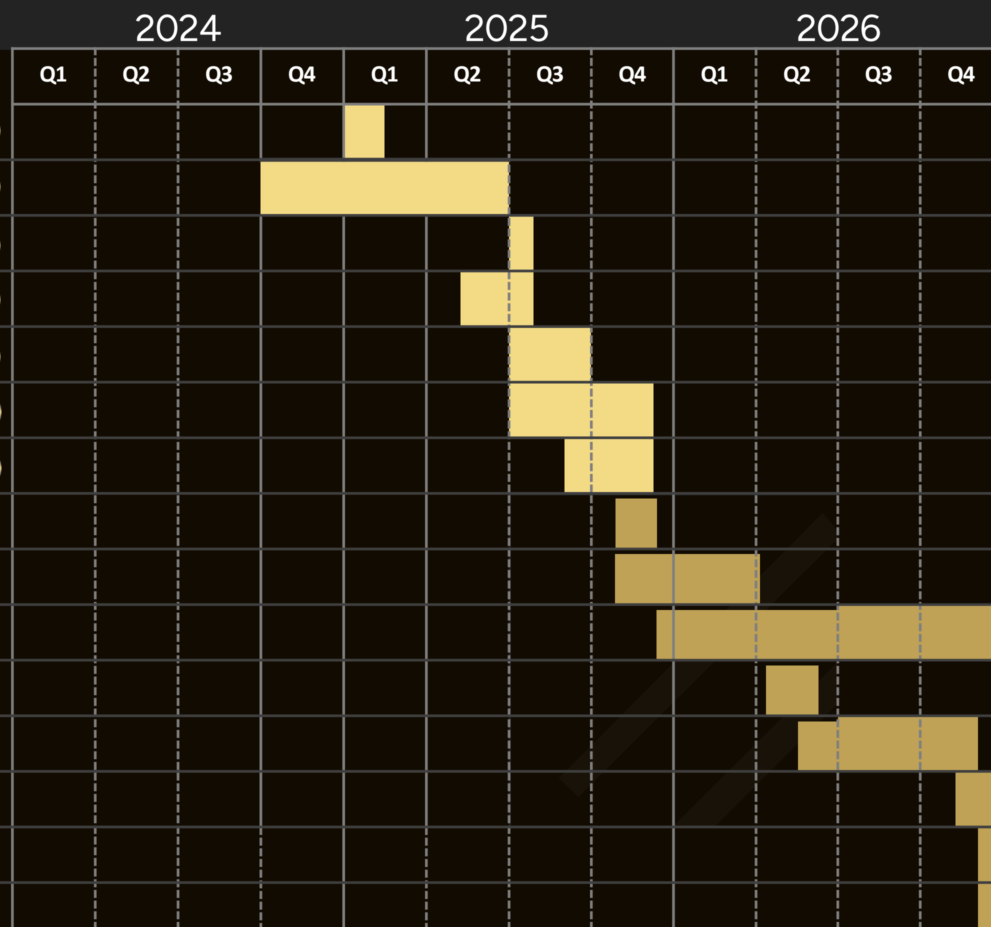
- ✓ Secured Option to acquire Quinchía Gold Project
- ✓ Strengthened leadership and Board teams
- ✓ Completed financings to fund PEA and listing
- ✓ Made first cash payment; Tiger appointed operator
- ✓ Historical data verification work program
- ✓ Updated Miraflores and Tesorito resource estimates
- ✓ Initiated ESG activities and stakeholder engagement
- ✓ Completed PEA and NI 43-101 Technical Report

## Upcoming Catalysts

- Launch marketing roadshows for listing financing
- Launch Phase 1 10,000 m drill program
- Complete go-public transaction and financing
- Phase 1 drill program results and resource update
- Advance ESG initiatives and prior consultation
- Launch Phase 2 drill programs
- Phase 2 drill programs results
- Phase 2 Tesorito Mineral Resource estimate
- Phase 2 engineering and metallurgical studies
- Evaluate potential resource additions on PEA engineering assumptions
- Evaluate next steps for Phase 2 engineering
- Decision to proceed to PFS

# Milestones and Catalysts

| Activities | |
|---|---|
| Property and collar surveys, new geospatial dataset | ✓ |
| Secure Option Agreement | ✓ |
| Private placement to fund PEA and go-public transaction | ✓ |
| Miraflores and Tesorito Mineral Resource updates | ✓ |
| Preliminary Economic Assessment (PEA) | ✓ |
| Revitalize ESG and community engagement programs | ✓ |
| Regional exploration to prioritize future drilling | ✓ |
| **Go-public listing and financing** | |
| Phase 1 - 10,000 m drill program | |
| Expand social engagement and ESG programs | |
| New Tesorito Mineral Resource | |
| Phase 2 Drill Programs | |
| Update Tesorito Mineral Resource | |
| Evaluate and update Phase 2 engineering plans | |
| Initiate Phase 2 engineering activities | |



# Why invest?

- Multi-million-ounce gold project in Colombia's prolific Mid-Cauca belt
- Strong PEA economics and large resource base
- Compelling valuation
- Increasing resources and de-risking toward PFS
- Proven leadership team with a track record of execution and surfacing shareholder value
