TSXV: **TIGR**

Cautionary Statements

This Presentation Does Not Constitute An Offer To Sell Or Buy Securities
This presentation was prepared as a summary overview only of the current affairs of Tiger Gold Corp. (the "**Company**" or "**Tiger Gold**") and was not prepared for the purpose of assisting prospective investors in deciding to invest in any security. The Company does not make any representation about the completeness, truth, or accuracy of the information contained in this presentation. The Company expressly warns readers not to rely on this information for investment purposes. The information contained herein is not and should not be construed as either an offer or solicitation to purchase securities in the Company, nor as legal, financial, or tax advice. No securities regulatory authority or similar authority has reviewed or in any way passed on the accuracy or adequacy of this presentation.

This Presentation Contains Forward-Looking Information And Statements
This presentation contains certain forward-looking statements and forward-looking information as defined under applicable Canadian securities laws. Statements contained in this presentation that are not historical facts are forward-looking statements that involve known and unknown risks and uncertainties. Any statements that refer to expectations, projections or other characterizations of future events or circumstances contain forward-looking statements. In certain cases, forward-looking statements and information can be identified using forward-looking terminology such as "may", "will", "would", "could", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans", "potential" or similar terminology. Forward-looking statements and information are made as of the date of this news release, and include, but are not limited to, the ability of the Company to complete its work programs, exploration activities and drilling plans as currently anticipated by management, the type and potential scale of production at the Quinchia Gold Project, the potential of the Company's mineral projects generally, the plans and goals of the Company, including key events and catalysts, the timing, cost, and completion of any future exploration plans at the Company's mineral properties, the Company listing on a stock exchange and the timing and terms thereof, and the anticipated terms and use of proceeds from the Company's future financings, the ability of the Company to complete future financings, the issued and outstanding securities of the Company at listing, projected mining and process recovery rates, capital and operating cost estimates and working capital requirements, and economic estimates and forecasts related to the Quinchia Gold Project. These forward-looking statements represent management's current beliefs, expectations, estimates and projections regarding future events and operating performance, which are based on information currently available to management, management's historical experience, perception of trends and current business conditions, expected future developments and other factors which management considers appropriate. Such forward-looking statements involve numerous risks and uncertainties, and actual results may vary.

Important risks and other factors that may cause actual results to vary include, without limitation, risks related to the ability of the Company to accomplish its plans and objectives with respect to the acquisition and development of its projects, including pursuant to the Option Agreement (as defined herein), within the expected timing or at all, the timing and receipt of certain required approvals, changes in commodity prices, costs of production, unanticipated reclamation costs unexpected , variations in quantity of mineralised material, grade, or recovery rates, risks inherent in exploration estimates and results, risks inherent in exploration and development activities, changes in development or miningplans due to changes in logistical, technical or other factors, unanticipatedoperational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications, cost escalation, unavailability of materials, equipment or third party contractors, delays in the receipt of government approvals, industrial disturbances, job action, and unanticipated events related to local communities, health, safety and environmental matters), changes in governmental regulation of mining operations, political risk, social unrest, changes in general economic conditions or conditions in the financial markets, risks related to the Company's ability to complete future financings on the terms anticipated, or at all, that the Company may not be able to list on a stock exchange on the timeline anticipated or at all, and other risks related to the ability of the Company to proceed with its plans for its mineral projects. In making the forward-looking statements in this news release, the Company has applied several material assumptions, including without limitation, the assumptions that: market fundamentals will result in sustained mineral demand and prices; any necessary approvals, consents, and permits (including environmental licenses and prior consultation of Indigenous communities requirements) in connection with the development of its projects will be obtained; financingfor the development, construction and continued operation of its projects will continue to be available on terms suitable to the Company; sustained commodity prices will continue to make its projects economically viable; there will not be any unfavourable changes to the economic, political, permitting and legal climate in which the Company operates; the Company will complete future financing on the terms and timeline currently anticipated by management; the Company will be able to carry out its exploration, drilling and work plans as anticipated by management and in the PEA (defined herein), and the Company will advance its current plans and goals, including listing on a stock exchange, on the timelines and in manner currently contemplated by management.
Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events, or results to differ materially from those described in forward-looking statements, there may be other factors that cause the actual results or performance by the Company to differ materially from those expressed in or implied by any forward-looking statements. Accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what impact they will have on the results of operations or the financial condition of the Company. Investors should therefore not place undue reliance on forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.

This Presentation Includes Market And Industry Data Obtained From Public Sources
This presentation includes market and industry data which was obtained from various publicly available sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third-party sources referred to in this presentation, or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company makes no representation as to the accuracy of such information.

Cautionary Note Regarding Technical Information and Historical Mineral Resource and Reserve Disclosure
Certain details in this presentation with respect to the Quinchía Gold Project are derived from the technical report and preliminary economic assessment, titled "Quinchía Gold Project, NI 43-101 Technical Report & Preliminary Economic Assessment, Department of Risaralda, Colombia", dated September 19, 2025
and with an effective date of September 18, 2025 (the "PEA"). The PEA was prepared by Ausenco Engineering Canada ULC, Moose Mountain Technical Services, and Aurum Consulting.. Any reference to capitalized terms, figures, tables or citations not included herein correspond to such items in the PEA. For readers to fully understand the technical information in this presentation, they should read the PEA (available on SEDAR+ at www.sedarplus.ca under the Company's profile) in its entirety, including all qualifications, assumptions and exclusions that relate to the technical and economic information herein. Such qualifications, assumptions and exclusions are not fully described herein and this presentation does not purport to be a complete summary of the PEA.
The Company cautions that the historical mineral resource and mineral reserve estimates discussed herein with respect to the Dos Quebradras deposit are considered historical in nature. A Qualified Person ("**QP**") as defined in *National Instrument 43-101 – Standards of Disclosure for Mineral Projects* ("**NI 43-101**") has not done sufficient work to classify these historical estimates as current mineral resources or mineral reserves. Consequently, the Company is not treating these historical estimates as current mineral resources or mineral reserves, and they should not be relied upon as such. While the historical estimates described herein were reported to have been prepared in accordance with the *Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves* ("**JORC**") and/or *CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines* ("**CIM**") in effect at the time of their preparation, there is no guarantee that they would be consistent with current standards and definitions.
The most recent historical Mineral Resource estimate for the Dos Quebradas deposit was prepared by Resource Development Associates Inc. (RDA) with an effective date of February 25, 2020, and reported by LCL in accordance with the JORC Code (2012). The Company has not undertaken sufficient independent verification of the data, assumptions, methodologies, or parameters upon which the historical estimates were based. There is a risk that any future verification work, exploration, analysis, and modelling may produce results that differ substantially from the historical estimates presented herein. The Company considers these historical estimates to be relevant as they indicate the potential presence and scale of mineralization on the properties. The Company intends to undertake data verification programs, potentially including assaying of historical core, database validation and verification, check surveys, and updated geological modelling to support the preparation of current mineral resource estimates prepared by a QP in accordance with current NI 43-101 and CIM standards. Tiger Gold considers Dos Quebradas an exploration prospect within the Quinchía Gold Project, with potential requiring further drilling and evaluation.

Qualified Person: Robert Vallis, P.Eng, MBA, a QP as defined by NI 43-101, has reviewed and approved the scientific and technical information in this presentation. Mr. Vallis is the President, Chief Executive Officer and a director of the Company and is not independent to the Company.

Investment Highlights

Proven Leadership

Management team and Board of proven mine builders with a strong global track record of creating shareholder value.

Multi-Million Oz Gold Deposit

Over 2M Oz of 43-101 Current Resources and growing.

Strong Project Economics

2025 PEA[1] valuation shows strong value in situ with $534M NPV at $2650/oz Au and over $1.2B NPV at $3700/oz Au.

Undervalued vs. Peers

Compelling upside and valuation

Expanding Resources

Drilling is underway to Expand Resources and advance the Project towards a PFS.

[1] cautionary notes provided in the appendix – page 17

Proven Cross-Functional Leadership Team

Quinchía Gold Project

Prolific Mining Belt

Tiger Gold holds an exclusive option[1] to acquire the Quinchía Gold Project, located in Colombia's Mid-Cauca porphyry belt. This region hosts many multi-million-ounce gold and copper-gold deposits and operating mines[1 2], including:

- Marmato Mine (Aris Mining) [2 3] – **6M oz Au**
- La Colosa (AngloGold Ashanti) [2 3] – **28M oz Au**
- Nuevo Chaquiro (AngloGold Ashanti) [2 3] – **7M oz Au**
- Gramalote (B2Gold) [2 3] – **5.2M oz Au**
- Buriticá Mine (Zijin Mining) [2 3] – **5.2M oz Au + 21M oz Ag**

Multi-Million Ounce Resource & Growing

The Quinchía Project hosts 510,000 oz Au (Measured & Indicated) at Miraflores[4] and 1,580,000 oz Au (Inferred) at Miraflores and Tesorito [4], plus a 459,000 oz Au historical estimate at Dos Quebradas [5].

- PEA[1] provides strong foundation. [5]
- Advance the project toward PFS.
- Phase 1 drilling complete.
- Phase 2 drilling underway to grow resources.

1. Velásquez Ruiz et al. (2021). [this is for qualifying the overall endowment of the Mid-Cauca belt
2. Company, industry reports, and Capital IQ. [this is for the other deposits on that slide
3. Mineralization hosted on nearby projects is not necessarily indicative of mineralization hosted on the Company's property, and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. [this is required whenever there is reference to another property that the issuer does not have in their portfolio

See Appendix slide 16, numbers 3, 6 - 12

Map: Exploration Sites (2025).

Established Regional Infrastructure

Map: Exploration Sites (2025).

Quinchía Gold Project

Phase 1 Drilling Complete. Phase 2 Drilling Underway.

14,000 m drilled across all deposits. Phase 2 underway to accelerate resource expansion, complete infill drill program at Tesorito and define a Maiden resource at Ceibal.

Extension Drilling

All deposits remain open on strike and at depth, indicating significant potential for resource additions. Drilling will test Mineral Resource expansion at depth, while at Tesorito it will test expansion at depth and along strike.

Exploration Drilling

Parallel to current infill and extension drilling, planned exploration drilling in 2026 will seek to address key geologic questions, including:

- Potential links between Tesorito and Ceibal at depth.
- Verification of Dos Quebradas geological model and scale.
- Step Out and Define scale of Ceibal and Chuscal's mineralized envelopes for future Resource definition drilling.

Tesorito Resource Definition Drilling

Planned infill drilling will focus on upgrading Inferred Mineral Resource to the Indicated category in preparation for future PFS level studies.

Map by Exploration Sites (2025).

Quinchía Project
Setting New Goals and Objectives

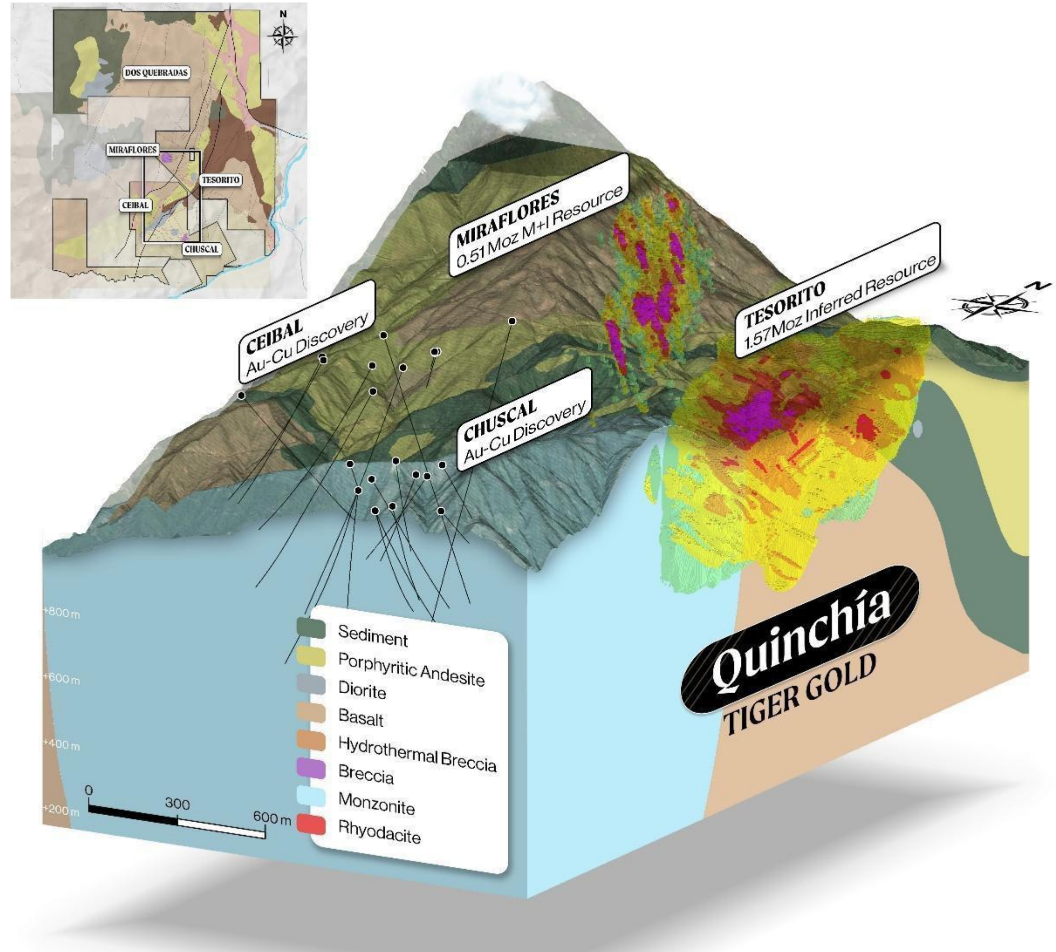
Multiple Deposits with Significant Upside Potential:

- **510k oz** Au Measured & Indicated Resource (Miraflores)
- **1,570k oz** Au Inferred Resource (Tesorito)
- **495k oz** Au Historical Resource[2] (Dos Quebradas) See slide 16, bullet 4 in appendix

2026/27 Work Program Primary Objectives

Accelerate drilling at Ceibal for an Initial Mineral Resource.

1. Increase Tesorito Mineral Resource Confidence through completing infill drill program.
2. Updated Mineral Resource at Tesorito
3. Evaluate how potential resource expansion may affect PEA[1] assumptions for staged development and initial capital planning.
4. Updated PEA[1] post completion of new mineral resource at Ceibal
5. Complete Engineering and technical data to support future PFS study



Graphic for illustration purposes only. Map and illustration by Exploration Sites (2025).

Ceibal and Chuscal

Future Resource Potential

Alteration, veining, and pathfinder vector to untested porphyry potential

2026 Drilling

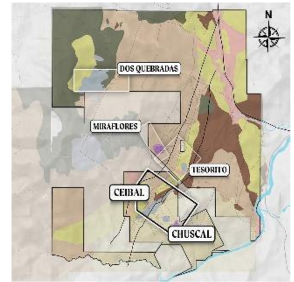
- New 15,000 m drill program underway to define an initial mineral resource estimate
- Discovery drilling planned at Chuscal to test scale of mineralization

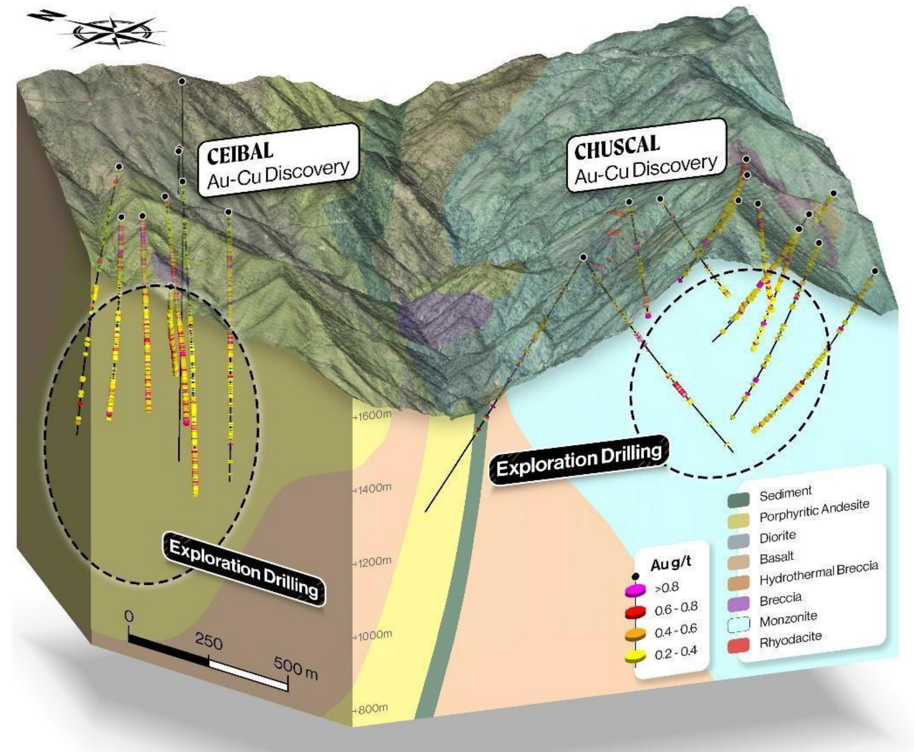
Ceibal Highlights

- Located ~1 km from the proposed PEA[1] processing plant.
- Similar structural setting to Tesorito within Marmato Fault corridor.
- Drill hole CEDDH02 returned **586 m at 0.51 g/t Au from surface**, including 14.1 m at 1.02 g/t Au from 572.5 m to end of hole.

Chuscal Highlights

- Located ~2 km from the proposed PEA[1] processing plant.
- Evidence for two gold-porphyry systems within project footprint with a large mineralized footprint on surface
- CCDDH10 returned 214 m at 0.7 g/t Au including 23 m 1.1 g/t Au and 9 m 2.2 g/t Au





Graphic and map prepared by Exploration Sites (2025).

Positioned for Growth

Milestones Achieved

- ✓ Secured Option to acquire Quinchía Gold Project
- ✓ Strengthened leadership and Board teams
- ✓ Completed financings to fund PEA[1] and listing
- ✓ Made first cash payment; Tiger appointed operator
- ✓ Historical data verification work program
- ✓ Updated Miraflores and Tesorito resource estimates
- ✓ Initiated ESG activities and stakeholder engagement
- ✓ Completed PEA[1] and NI 43-101 Technical Report
- ✓ Completed Phase 1 10,000 m drill program
- ✓ Completed go-public transaction and subsequent financings
- ✓ Successfully raised $44M to-date
- ✓ Launched Phase 2 22,000 m drill program

Upcoming Catalysts

- Phase 2 drill program results (Ceibal resource drilling, complete Tesorito infill drilling, and discovery drilling)
- Update Mineral Resources at Tesorito
- New Maiden resource at Ceibal
- Updated PEA[1]
- Advance engineering and metallurgical work
- Advance ESG initiatives and permitting
- Evaluate next steps for Phase 2 engineering
- Decision to proceed to PFS

Tel: (604) 359-1489

1. Company, industry reports, and Capital IQ..
2. Mineralization hosted on nearby projects is not necessarily indicative of mineralization hosted on the Company's property, and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. See slide 8 for Mineral Resource details.
4. This estimate is considered historical and has not been verified by Tiger. A QP has not done sufficient work to classify this estimate as current, and Tiger is not treating it as current. Recommended work programs include assaying of historical core to confirm grades, database validation and verification to ensure data integrity, and updated geological modelling to align with current CIM Definition Standards for Mineral Resources and Mineral Reserves. Tiger considers Dos Quebradas an exploration prospect within the Quinchía Gold Project, with potential requiring further drilling and evaluation.
5. Readers are cautioned that this assessment is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that this preliminary economic assessment will be realized. Life of mine (LOM) cash costs consists of mining costs, processing costs, mine site G&A, refining charges, and royalties. AISC includes cash costs plus sustaining capital, closure cost, and salvage value . See cautionary note on non-IFRS measures. Silver price fixed at US$29.51/oz Ag in both cases.
6. A cut-off grade of 1.37 g/t Au has been applied as to define the underground resource reporting shape.
7. Pit-constrained cut-off grade of 0.2 g/t Au.
8. Contained metal and tonnes figures in totals may differ due to rounding.
9. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.
10. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, marketing, or other relevant issues.
11. The Mineral Resources were estimated using CIM (2014) Standards on Mineral Resources and Reserves, Definitions and Guidelines.
12. The quantity and grade of reported the Inferred Mineral Resource in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred Mineral Resource as an Indicated or Measured Mineral Resource. It is uncertain if further exploration will result in upgrading any of the Inferred Mineral Resources to an Indicated or Measured Mineral Resource category."

Appendix
disclosure statements:

1. The preliminary economic assessment ("PEA") is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that the PEA will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.The PEA is based upon the Mineral Resource estimates for the Miraflores and Tesorito deposits with an effective date of July 31, 2025, and upon the assumptions, parameters and qualifications set out in the Technical Report. The Company has not completed a current pre-feasibility study or feasibility study on the project; studies completed by prior operators are treated as historical and not as current. Accordingly, the PEA does not affect the results of any current pre-feasibility or feasibility study.

2. Historical Inferred Mineral Resource: 20.2 Mt at 0.71 g/t Au (459,000 oz Au), reported at a 0.5 g/t Au cut-off grade.Source and date: Prepared by Resource Development Associates Inc. with an effective date of February 25, 2020, in accordance with the JORC Code (2012), and reported by Los Cerros Limited, a prior operator of the property; Relevance and reliability: The Company considers the historical estimate relevant because it indicates the potential presence and scale of mineralization at Dos Quebradas. While reportedly prepared in accordance with the JORC Code (2012), consistency with current standards is not assured. Tiger has not independently verified the underlying data and the estimate should not be relied upon; Key assumptions: parameters and methods. Based upon 19 historical diamond drillholes totalling 8,824 m at approximately 25 m section spacing, defining mineralization over approximately 400 m by 300 m from surface to approximately 550 m depth, hosted in diorite porphyry and intrusive breccias. A cut-off grade of 0.5 g/t Au was applied; Categories: The estimate uses the Inferred Mineral Resource category under the JORC Code (2012), substantively equivalent to the Inferred category in the CIM Definition Standards incorporated by reference into NI 43-101; More recent information: Tiger completed an initial three-hole diamond drill program at Dos Quebradas in 2026 totalling 1,274.65 m, disclosed in the Company's news releases. No current Mineral Resource estimate has been prepared for Dos Quebradas; Work required to upgrade or verify: Relogging and resampling of historical core, database validation, check surveys, additional infill and confirmation drilling, and updated geological modelling and resource estimation in accordance with NI 43-101 and CIM guidelines; A qualified person has not done sufficient work to classify the historical estimate as current Mineral Resources or Mineral Reserves, and the Company is not treating the historical estimate as current Mineral Resources or Mineral Reserves.
