TIGER GOLD

Advancing Colombia's Next Gold Mine

Strictly Private and Confidential

TSXV: **TIGR**

Cautionary Statements

This Presentation Does Not Constitute An Offer To Sell Or Buy Securities
This presentation was prepared as a summary overview only of the current affairs of Tiger Gold Corp. (the "**Company**" or "**Tiger Gold**") and was not prepared for the purpose of assisting prospective investors in deciding to invest in any security. The Company does not make any representation about the completeness, truth, or accuracy of the information contained in this presentation. The Company expressly warns readers not to rely on this information for investment purposes. The information contained herein is not and should not be construed as either an offer or solicitation to purchase securities in the Company, nor as legal, financial, or tax advice. No securities regulatory authority or similar authority has reviewed or in any way passed on the accuracy or adequacy of this presentation.

This Presentation Contains Forward-Looking Information And Statements
This presentation contains certain forward-looking statements and forward-looking information as defined under applicable Canadian securities laws. Statements contained in this presentation that are not historical facts are forward-looking statements that involve known and unknown risks and uncertainties. Any statements that refer to expectations, projections or other characterizations of future events or circumstances contain forward-looking statements. In certain cases, forward-looking statements and information can be identified using forward-looking terminology such as "may", "will", "would", "could", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans", "potential" or similar terminology. Forward-looking statements and information are made as of the date of this news release, and include, but are not limited to, the ability of the Company to complete its work programs, exploration activities and drilling plans as currently anticipated by management, the type and potential scale of production at the Quinchia Gold Project, the potential of the Company's mineral projects generally, the plans and goals of the Company, including key events and catalysts, the timing, cost, and completion of any future exploration plans at the Company's mineral properties, the Company listing on a stock exchange and the timing and terms thereof, and the anticipated terms and use of proceeds from the Company's future financings, the ability of the Company to complete future financings, the issued and outstanding securities of the Company at listing, projected mining and process recovery rates, capital and operating cost estimates and working capital requirements, and economic estimates and forecasts related to the Quinchia Gold Project. These forward-looking statements represent management's current beliefs, expectations, estimates and projections regarding future events and operating performance, which are based on information currently available to management, management's historical experience, perception of trends and current business conditions, expected future developments and other factors which management considers appropriate. Such forward-looking statements involve numerous risks and uncertainties, and actual results may vary.

Important risks and other factors that may cause actual results to vary include, without limitation, risks related to the ability of the Company to accomplish its plans and objectives with respect to the acquisition and development of its projects, including pursuant to the Option Agreement (as defined herein), within the expected timing or at all, the timing and receipt of certain required approvals, changes in commodity prices, costs of production, unanticipated reclamation costs unexpected , variations in quantity of mineralised material, grade, or recovery rates, risks inherent in exploration estimates and results, risks inherent in exploration and development activities, changes in development or mining plans due to changes in logistical, technical or other factors, unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications, cost escalation, unavailability of materials, equipment or third party contractors, delays in the receipt of government approvals, industrial disturbances, job action, and unanticipated events related to local communities, health, safety and environmental matters), changes in governmental regulation of mining operations, political risk, social unrest, changes in general economic conditions or conditions in the financial markets, risks related to the Company's ability to complete future financings on the terms anticipated, or at all, that the Company may not be able to list on a stock exchange on the timeline anticipated or at all, and other risks related to the ability of the Company to proceed with its plans for its mineral projects. In making the forward-looking statements in this news release, the Company has applied several material assumptions, including without limitation, the assumptions that: market fundamentals will result in sustained mineral demand and prices; any necessary approvals, consents, and permits (including environmental licenses and prior consultation of Indigenous communities requirements) in connection with the development of its projects will be obtained; financing for the development, construction and continued operation of its projects will continue to be available on terms suitable to the Company; sustained commodity prices will continue to make its projects economically viable; there will not be any unfavourable changes to the economic, political, permitting and legal climate in which the Company operates; the Company will complete future financing on the terms and timeline currently anticipated by management; the Company will be able to carry out its exploration, drilling and work plans as anticipated by management and in the PEA (defined herein), and the Company will advance its current plans and goals, including listing on a stock exchange, on the timelines and in manner currently contemplated by management.
Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events, or results to differ materially from those described in forward-looking statements, there may be other factors that cause the actual results or performance by the Company to differ materially from those expressed in or implied by any forward-looking statements. Accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what impact they will have on the results of operations or the financial condition of the Company. Investors should therefore not place undue reliance on forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.

This Presentation Includes Market And Industry Data Obtained From Public Sources
This presentation includes market and industry data which was obtained from various publicly available sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third-party sources referred to in this presentation, or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company makes no representation as to the accuracy of such information.

Cautionary Note Regarding Technical Information and Historical Mineral Resource and Reserve Disclosure
Certain details in this presentation with respect to the Quinchía Gold Project are derived from the technical report and preliminary economic assessment, titled "Quinchía Gold Project, NI 43-101 Technical Report & Preliminary Economic Assessment, Department of Risaralda, Colombia", dated September 19, 2025
and with an effective date of September 18, 2025 (the "PEA"). The PEA was prepared by Ausenco Engineering Canada ULC, Moose Mountain Technical Services, and Aurum Consulting.. Any reference to capitalized terms, figures, tables or citations not included herein correspond to such items in the PEA. For readers to fully understand the technical information in this presentation, they should read the PEA (available on SEDAR+ at www.sedarplus.ca under the Company's profile) in its entirety, including all qualifications, assumptions and exclusions that relate to the technical and economic information herein. Such qualifications, assumptions and exclusions are not fully described herein and this presentation does not purport to be a complete summary of the PEA.
The Company cautions that the historical mineral resource and mineral reserve estimates discussed herein with respect to the Dos Quebradras deposit are considered historical in nature. A Qualified Person ("**QP**") as defined in *National Instrument 43-101 – Standards of Disclosure for Mineral Projects* ("**NI 43-101**") has not done sufficient work to classify these historical estimates as current mineral resources or mineral reserves. Consequently, the Company is not treating these historical estimates as current mineral resources or mineral reserves, and they should not be relied upon as such. While the historical estimates described herein were reported to have been prepared in accordance with the *Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves* ("**JORC**") and/or *CIM Estimation of Mineral Resources and Mineral Reserves Best Practice Guidelines* ("**CIM**") in effect at the time of their preparation, there is no guarantee that they would be consistent with current standards and definitions.
The most recent historical Mineral Resource estimate for the Dos Quebradas deposit was prepared by Resource Development Associates Inc. (RDA) with an effective date of February 25, 2020, and reported by LCL in accordance with the JORC Code (2012). The Company has not undertaken sufficient independent verification of the data, assumptions, methodologies, or parameters upon which the historical estimates were based. There is a risk that any future verification work, exploration, analysis, and modelling may produce results that differ substantially from the historical estimates presented herein. The Company considers these historical estimates to be relevant as they indicate the potential presence and scale of mineralization on the properties. The Company intends to undertake data verification programs, potentially including assaying of historical core, database validation and verification, check surveys, and updated geological modelling to support the preparation of current mineral resource estimates prepared by a QP in accordance with current NI 43-101 and CIM standards. Tiger Gold considers Dos Quebradas an exploration prospect within the Quinchía Gold Project, with potential requiring further drilling and evaluation.

Qualified Person: Robert Vallis, P.Eng, MBA, a QP as defined by NI 43-101, has reviewed and approved the scientific and technical information in this presentation. Mr. Vallis is the President, Chief Executive Officer and a director of the Company and is not independent to the Company.

Investment Highlights

Proven Leadership

Management team and Board of proven mine builders with a strong global track record of creating shareholder value.

Multi-Million Oz Gold Deposit

Miraflores: 6.1 Mt at 2.62 g/t Au for **510,000 Oz Au Indicated**

Tesorito: 104 Mt at 0.47 g/t Au for **1.57 Moz Au Inferred**

Dos Quebradas: 459k oz Au Historical Resource.

Strong Project Economics

2025 PEA[1] valuation shows strong value in situ with \$534M NPV at \$2650/oz Au and **\$1.2B NPV at \$3700/oz Au.**

Undervalued vs. Peers

Compelling upside and valuation

Expanding Resources

Drilling is underway to Expand Resources and advance the Project towards a PFS.

Colombia's Mid-Cacau Belt

Tiger Gold's Quinchía Gold Project is located in Colombia's prolific Mid-Cauca porphyry belt. This region hosts many multi-million-ounce gold and copper-gold deposits and operating mines:

Multi-Million Ounce Resource & Growing

- ✓ Mineral Resources — Quinchía Gold Project [3]
  - **Miraflores:** 6.1 Mt at 2.62 g/t Au for 510K Oz Au Indicated
  - **Tesorito:** 104 Mt at 0.47 g/t Au for 1.57 Moz Au Inferred
  - **Dos Quebradas**: 459k oz Au Historical Resource.
- ✓ PEA[1] provides strong foundation.
- ✓ Advance the project toward PFS.
- ✓ Phase 1 drilling complete.
- ✓ Phase 2 drilling underway to grow resources.

Map: Exploration Sites (2025).

A New Era in Colombia

Colombia's New Administration has publicly emphasized investment, permitting reform and actions to support foreign investment and mining growth.

Increase Foreign Investment(1)

This new Administration has promised to unlock $3.5B - $4B in foreign investment in frozen projects that have been held up with permits.

Expedited Permitting(2)

Stalled projects, and streamlined regulatory framework for permitting are top of the agenda

De-Regulation & Tax Reform(3)

Promises to eliminate the "regulatory jungle" and red tape of getting licenses and permits and structural tax reforms aimed at simplifying the system and removing high corporate taxes

Increased Security & Crackdown on Illegal Mining

Programs contains an offensive against illegal mining and a mass formalisation process for small miners,

REUTERS

" In mining, Colombia has five gold, copper, coal and nickel projects that have completed exploration or obtained licenses but have not moved into construction because of legal and political uncertainty under Petro, said **Juan Camilo Nariño, head of the Colombian Mining Association**.

"The investments are on the verge of materializing and could amount to between $3.6 billion and $4 billion over the next four years, " Nariño said."

La República

"Mining and oil companies are ready to invest billions of dollars in Colombia after four years of paralysis in the exploration of new deposits"

Established Mining Region & Infrastructure

Map: Exploration Sites (2025).

Execution & Progress at Quinchia

$45M Raised to date. 100% owned. Phase 1 Complete. New Zones Identified to Grow Resources.

1

Raise Over $45M to Date

Closed a $21M financing (June 2026), led by existing and new institutional and long-term shareholders, to accelerate drilling at Ceibal and other targets. Fully funded for the announced program.

2

100% Ownership

Completed the final option payment. Tiger Gold now owns 100% of the Quinchía Gold Project — every metre drilled and every dollar of study work now accrues entirely to shareholders.

3

Significant Drilling Completed

More than 18,000 m of drilling completed at Tesorito, Dos Quebradas, and Ceibal to date.

4

Ceibal Expansion Underway

Drilling has identified a near-surface mineralized system at Ceibal that is near the deposits that formed the basis of the 2025 PEA*.

5

Next Phase of Drilling has Commenced

A new 19,500 m drill campaign is underway for H2 2026, designed to expand the resource base ahead of an updated PEA and follow-on PFS-level studies.

[1] The preliminary economic assessment ("PEA") is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that the PEA will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The PEA is based upon the Mineral Resource estimates for the Miraflores and Tesorito deposits with an effective date of July 31, 2025, and upon the assumptions, parameters and qualifications set out in the Technical Report. The Company has not completed a current pre-feasibility study or feasibility study on the project; studies completed by prior operators are treated as historical and not as current. Accordingly, the PEA does not affect the results of any current pre-feasibility or feasibility study.

The Road Ahead

Phase 1 Complete. Phase 2 Drilling Underway.
Over 30,000m of drilling in 2026 underway to accelerate resource expansion, upgrade category confidence at Tesorito and new ounce discovery including a Maiden resource at Ceibal.

Tesorito

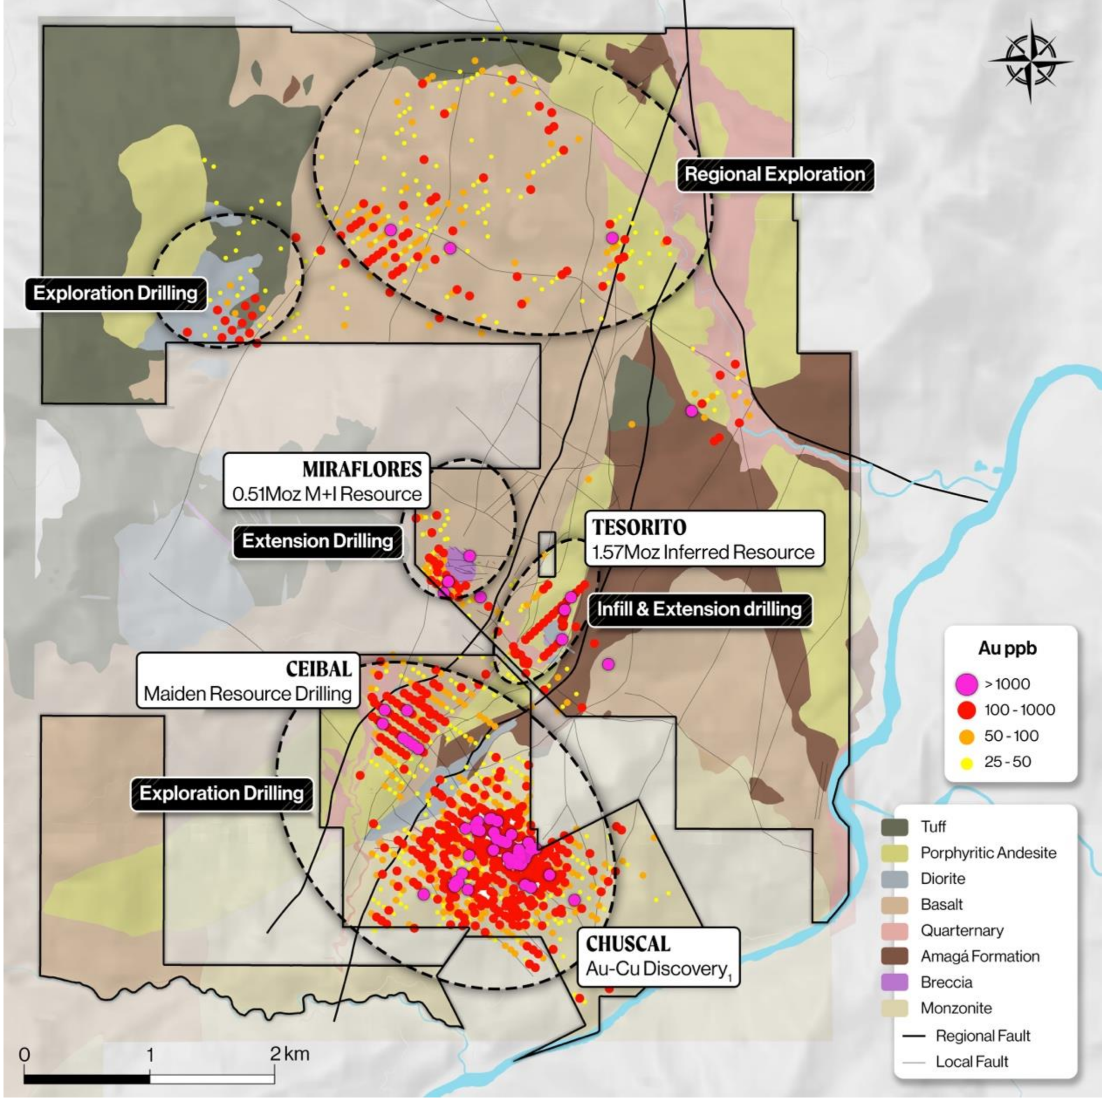
Completing infill drilling to M&I categorization to improve resource confidence for next stage PFS engineering

Ceibal

Continue step out drilling to define the deposit's scale, complete resource definition drilling toward a targeted maiden mineral resource.

Chuscal & Other Targets

Discovery drilling planned at other high priority targets with the most upside of discovery of new ounces, including Chuscal (next to Ceibal), and other epithermal targets to the north.



Map by Exploration Sites (2025).

[1] These assay results were previously reported by LCL Resources Limited (formerly Los Cerros Limited, and previously Metminco Limited) in news releases dated November 25, 2019, December 5, 2019, December 23, 2019, January 20, 2020, December 7, 2020 and March 16, 2021.

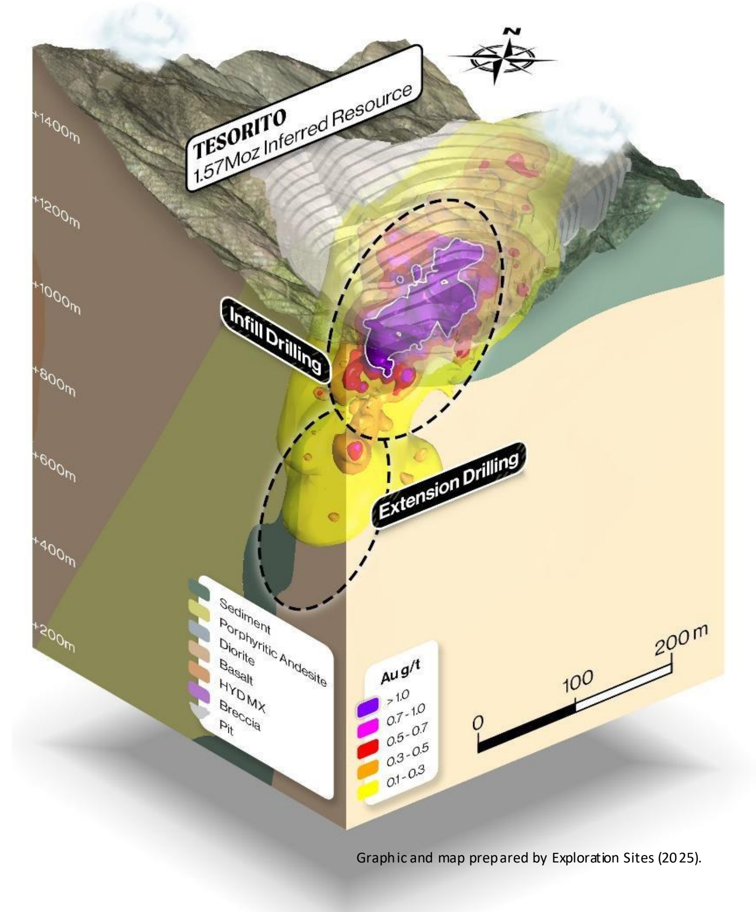
Tesorito

Expansion & Upgrading Confidence

104 Mt at 0.47 g/t Au for **1.57 Moz Au Inferred Resource**

2025/26 Drilling

- **Infill Drilling:** Nearly completed to increase confidence in Tesorito Mineral Resource. Tigter spacing, better continuity and more ounces categorized to M&I
- **Open Margins:** Deposit is still open at depth and partially along strike
- **Feeder System Indicators:** Recent porphyry-style intervals refine the model and point towards higher grade extensions at depth
- **Updated Resource:** Targeting an updated MRE towards end of year once infill drilling is complete.



Graphic and map prepared by Exploration Sites (2025).

1. See slide 8 for additional details on Mineral Resource estimate.

Ceibal

Future Resource Potential

Step-out and extension drilling underway towards a Maiden Resource Q1 2027

2026 Drilling

- New 15,000 m drill program underway to define an initial mineral resource estimate by Q1 2027

Recent Drilling Continues to Expand Deposit's Scale:

CEDDH-009 (May 13, 2026) - **52 m @ 0.7 g/t Au from surface;** incl. 12 m @ 1.5 g/t (0 m). **Also 226 m @ 0.6 g/t from 76 m; incl. 10 m @ 3.0 g/t (94 m).** Also 46 m @ 0.2 g/t from 314 m

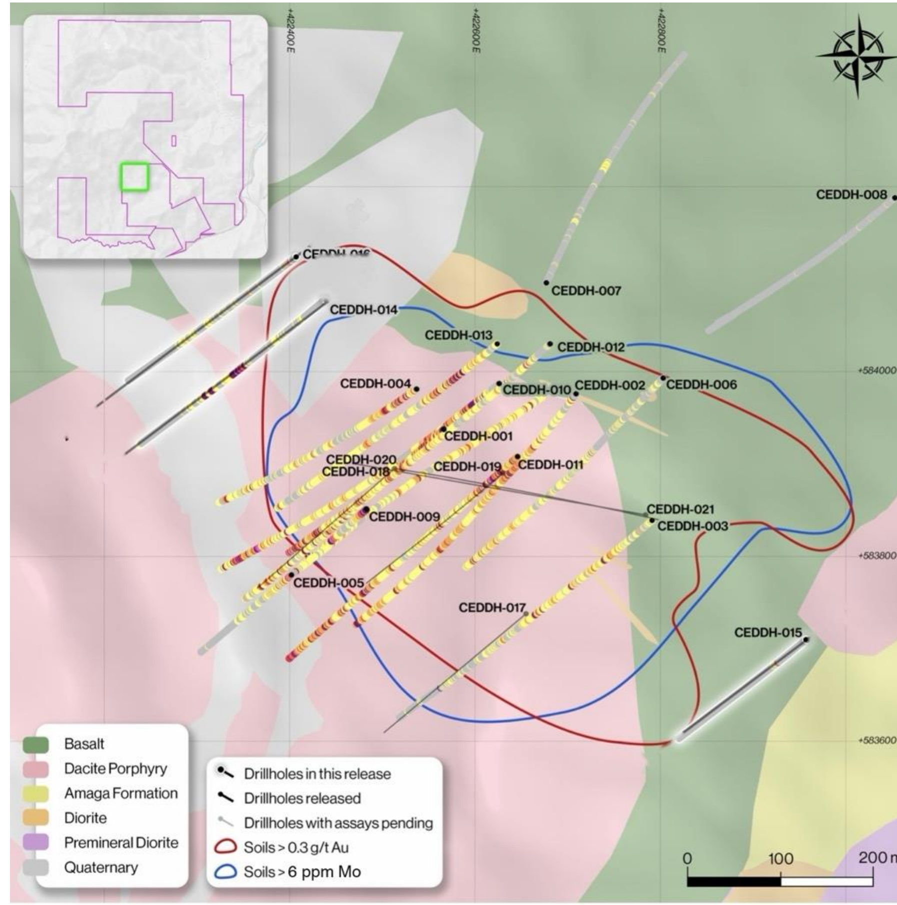
CEDDH-010 (Jun 2, 2026) - **214.2 m @ 0.7 g/t Au from 22 m**; incl. **23 m @ 1.1 g/t (55 m),** incl. 8m @ 1.0 g/t (86 m). Also 437.05 m @ 0.5 g/t from 270.65 m to EOH; incl. 9 m @ 2.2 g/t (613 m), incl. 10 m @ 1.4 g/t (656 m)

CEDDH-011 (Jul 23, 2026) - **685.35 m @ 0.6 g/t Au from surface to EOH;** incl. 7 m @ 1.0 g/t (7m), incl. 8 m @ 1.1 g/t (42 m), **incl. 12 m @ 1.5 g/t (66 m), incl. 20 m @ 1.2 g/t (86 m), incl. 16 m@ 1.2 g/t (438 m), incl. 6 m @ 1.8 g/t (660 m)**

CEDDH-012 (Jul 23, 2026) - **568.4 m @ 0.6 g/t Au from 309.5 m to EOH at 877.9 m; incl. 5 m @1.0 g/t (485 m), incl. 16.75 m @ 1.0 g/t (764 m), incl. 12 m @ 1.0 g/t (845 m), incl. 12 m @ 1.2 g/(864 m).** Also 59.8 m @ 0.5 g/t from 42 m, 34 m @ 0.3 g/t from 112 m, 139.16 m @ 0.3 g/t from157.84 m

CEDDH-013 (Jul 23, 2026) - **536 m @ 0.4 g/t Au from surface;** incl. 6 m @ 1.2 g/t (90 m), incl. 10m @ 1.2 g/t (102 m), incl. 6 m @ 1.1 g/t (118 m). Also 28.05 m @ 0.4 g/t from 570 m to EOH at598.05 m

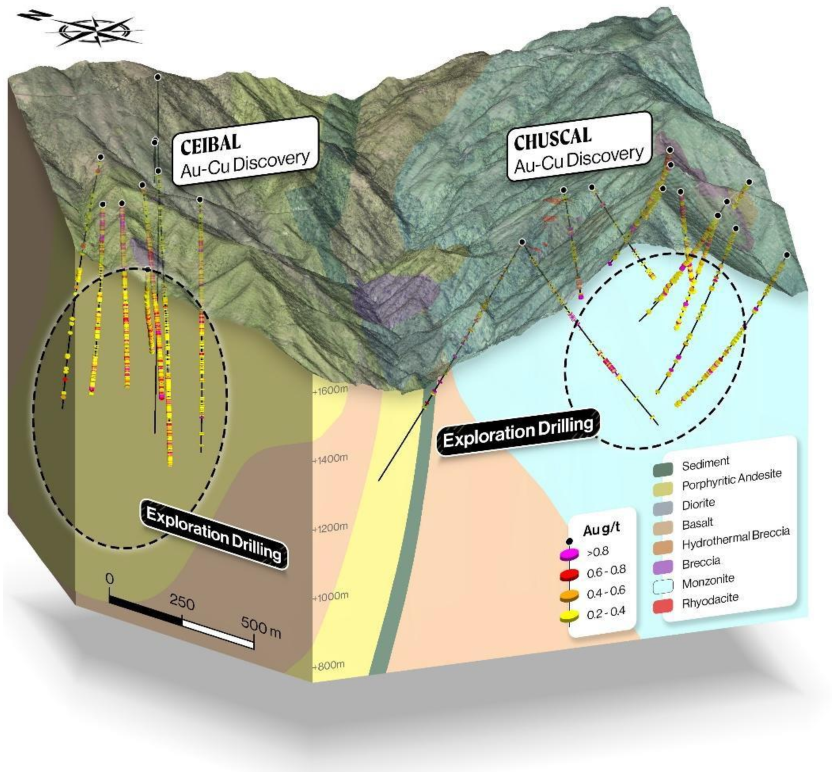
CEDDH-014 (Aug 18th, 2026) - **79 m @ 0.8 g/t Au, Including 26 m @ 1.4 g/t Au,** in 192-Metre Northwest Step-Out at Ceibal



Graphic and map prepared by Exploration Sites (2025).

Ceibal Changes the Story

2 Rigs active. The same fault corridor. Resource growth potential and district scale opportunity



Same Regional Structure

Drilling at Ceibal has outlined a northwest to north trending mineralized corridor that is interpreted to be sub-vertical, and sits within the Marmato Fault Corridor, in a structural setting similar to Tesorito.

Right next door

~1 km south of Miraflores, ~1 km southwest of Tesorito, and ~1 km from the processing plant location proposed in the 2025 PEA.

District Scale Potential

With Tesorito, Miraflores and Dos Quebradas already discovered, a new deposit at Ceibal creates a district scale opportunity at Quinchia.

Corridor remains open to the southwest and across its strike

Mineralization remains open to the southwest and, in the central part of the corridor, across its apparent strike. The extent of mineralization to the north and north-northeast has not been tested.

*Historical Inferred Mineral Resource: 20.2 Mt at 0.71 g/t Au (459,000 oz Au), reported at a 0.5 g/t Au cut-off grade.
Source and date: Prepared by Resource Development Associates Inc. with an effective date of February 25, 2020, in accordance with the JORC Code (2012), and reported by Los Cerros Limited, a prior operator of the property; Relevance and reliability: The Company considers the historical estimate relevant because it indicates the potential presence and scale of mineralization at Dos Quebradas. While reportedly prepared in accordance with the JORC Code (2012), consistency with current standards is not assured. Tiger has not independently verified the underlying data and the estimate should not be relied upon; Key assumptions: parameters and methods. Based upon 19 historical diamond drillholes totalling 8,824 m at approximately 25 m section spacing, defining mineralization over approximately 400 m by 300 m from surface to approximately 550 m depth, hosted in diorite porphyry and intrusive breccias. A cut-off grade of 0.5 g/t Au was applied; Categories: The estimate uses the Inferred Mineral Resource category under the JORC Code (2012), substantively equivalent to the Inferred category in the CIM Definition Standards incorporated by reference into NI 43-101

Key Upcoming Catalysts

Every date below is a target, not a commitment.

1.	**H2 2026 drill results**	Ceibal exploration drilling, Tesorito infill, gap, and extension drilling, and new discovery drilling to be released in verified batches over the coming months.
2.	**Maiden Mineral Resource at Ceibal**	Turns Ceibal from a story into a potential material part of the project and confirms a District at Quinchia
3.	**Updated Mineral Resource at Tesorito**	Converts drilling confidence into study-grade input for next stage PEA update and subsequent PFS work.
4.	**Updated PEA**	Following completion of a maiden Mineral Resource at Ceibal and Tesorito Mineral Resource Update; Updating project economics with new resource base at current metal prices.
5.	**Engineering, ESG, and Permitting**	Advancing in parallel with drilling to inform next stage PEA update and targeted H2 2027 PFS work. The reason 100% ownership matters.
6.	**Decision to proceed to PFS**	The decision to proceed with a targeted H2 2027 prefeasibility study ("PFS") is driven by how much engineering and environmental work has been completed to sufficiently inform a PFS and permitting preparations.

Timing of all milestones is subject to drilling results, assay turnaround, third-party laboratory and consultant schedules, and regulatory processes.

Undervalued Against Public Peers

1. Company, industry reports, and Capital IQ..
2. Mineralization hosted on nearby projects is not necessarily indicative of mineralization hosted on the Company's property, and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. See slide 8 for Mineral Resource details.
4. This estimate is considered historical and has not been verified by Tiger. A QP has not done sufficient work to classify this estimate as current, and Tiger is not treating it as current. Recommended work programs include assaying of historical core to confirm grades, database validation and verification to ensure data integrity, and updated geological modelling to align with current CIM Definition Standards for Mineral Resources and Mineral Reserves. Tiger considers Dos Quebradas an exploration prospect within the Quinchía Gold Project, with potential requiring further drilling and evaluation.
5. Readers are cautioned that this assessment is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that this preliminary economic assessment will be realized. Life of mine (LOM) cash costs consists of mining costs, processing costs, mine site G&A, refining charges, and royalties. AISC includes cash costs plus sustaining capital, closure cost, and salvage value . See cautionary note on non-IFRS measures. Silver price fixed at US$29.51/oz Ag in both cases.
6. A cut-off grade of 1.37 g/t Au has been applied as to define the underground resource reporting shape.
7. Pit-constrained cut-off grade of 0.2 g/t Au.
8. Contained metal and tonnes figures in totals may differ due to rounding.
9. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.
10. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, marketing, or other relevant issues.
11. The Mineral Resources were estimated using CIM (2014) Standards on Mineral Resources and Reserves, Definitions and Guidelines
12. The quantity and grade of reported the Inferred Mineral Resource in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred Mineral Resource as an Indicated or Measured Mineral Resource. It is uncertain if further exploration will result in upgrading any of the Inferred Mineral Resources to an Indicated or Measured Mineral Resource category."

Appendix
disclosure statements:

1. The preliminary economic assessment ("PEA") is preliminary in nature. It includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves, and there is no certainty that the PEA will be realized. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. The PEA is based upon the Mineral Resource estimates for the Miraflores and Tesorito deposits with an effective date of July 31, 2025, and upon the assumptions, parameters and qualifications set out in the Technical Report. The Company has not completed a current pre-feasibility study or feasibility study on the project; studies completed by prior operators are treated as historical and not as current. Accordingly, the PEA does not affect the results of any current pre-feasibility or feasibility study.

2. Historical Inferred Mineral Resource: 20.2 Mt at 0.71 g/t Au (459,000 oz Au), reported at a 0.5 g/t Au cut-off grade. Source and date: Prepared by Resource Development Associates Inc. with an effective date of February 25, 2020, in accordance with the JORC Code (2012), and reported by Los Cerros Limited, a prior operator of the property; Relevance and reliability: The Company considers the historical estimate relevant because it indicates the potential presence and scale of mineralization at Dos Quebradas. While reportedly prepared in accordance with the JORC Code (2012), consistency with current standards is not assured. Tiger has not independently verified the underlying data and the estimate should not be relied upon; Key assumptions: parameters and methods. Based upon 19 historical diamond drillholes totaling 8,824 m at approximately 25 m section spacing, defining mineralization over approximately 400 m by 300 m from surface to approximately 550 m depth, hosted in diorite porphyry and intrusive breccias. A cut-off grade of 0.5 g/t Au was applied; Categories: The estimate uses the Inferred Mineral Resource category under the JORC Code (2012), substantively equivalent to the Inferred category in the CIM Definition Standards incorporated by reference into NI 43-101; More recent information: Tiger completed an initial three-hole diamond drill program at Dos Quebradas in 2026 totaling 1,274.65 m, disclosed in the Company's news releases. No current Mineral Resource estimate has been prepared for Dos Quebradas; Work required to upgrade or verify: Relogging and resampling of historical core, database validation, check surveys, additional infill and confirmation drilling, and updated geological modelling and resource estimation in accordance with NI 43-101 and CIM guidelines; A qualified person has not done sufficient work to classify the historical estimate as current Mineral Resources or Mineral Reserves, and the Company is not treating the historical estimate as current Mineral Resources or Mineral Reserves.

3. Mineral Resource estimates have an effective date of July 31, 2025 and are reported in the Technical Report. Mineral Resources are reported by category. Inferred Mineral Resources are not added to Measured and Indicated Mineral Resources. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. There is no certainty that any part of an Inferred Mineral Resource will be converted to an Indicated or Measured Mineral Resource. No Mineral Reserves have been estimated on the Quinchía Gold Project

4. Velásquez Ruiz et al. (2021). [this is for qualifying the overall endowment of the Mid-Cauca belt
5. Company, industry reports, and Capital IQ. [this is for the other deposits on that slide
6. Mineralization hosted on nearby projects is not necessarily indicative of mineralization hosted on the Company’s property, and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. [this is required whenever there is reference to another property that the issuer does not have in their portfolio

Qualified Person

The scientific and technical information on this website has been reviewed and approved by Robert Vallis, P.Eng., President and Chief Executive Officer of Tiger Gold Corp., a "qualified person" as defined in National Instrument 43-101 ("NI 43-101"). Mr. Vallis is not independent of the Company, being an officer, director and securityholder. Technical information on this website is derived from the technical report titled "Quinchía Gold Project NI 43-101 Technical Report & Preliminary Economic Assessment, Department of Risaralda, Colombia" with an effective date of September 18, 2025 (the "Technical Report"), filed on SEDAR+ on December 10, 2025, and from the Company's news releases.
